“Meeting Notes”

SUMMARY

You can use "Google Drive" cloud storage to protect yourself from the losing data files and to access data files on multiple computers, cell phones, and computing devices.

"Google Drive" Server Farms

- Approximately 2 million servers for Google services such as "Google Drive", "Gmail", "Google Site", "Google Voice", "Google+", etc.
- Server farms are located in 12 places:
 1. Council Bluffs, Iowa
 2. The Dalles, Oregon
 3. Douglas County, Georgia
 4. Lenoir, North Carolina
 5. Pryor in Mayes County, Oklahoma
 6. Berkeley County, South Carolina
 7. Quilicura, Chile
 8. Hamina, Finland
 9. St. Ghislain, Belgium
 10. Dublin, Ireland
 11. Singapore
 12. Changhua County, Taiwan

The map in the previous page

Upload or download single files
Download entire folders as zip files
Can upload entire folders

Web Browser to
access
drive.google.com

Native
upload/download
capability in
Chrome browser.
A Java applet
add-on is
provided by
Google for folder
uploads in other
browsers.
Single file
uploads and
downloads with
HTML

"Google Drive"
which is a
desktop
application for
"Windows XP",
"Windows Vista",
"Windows 7",
"Windows 8", or
"Mac OS X 10.6+"

Upload folders or
single files

(No downloads using
the "Google Drive"
program)

For the Windows 8's "Start screen"-based
"Internet Explorer 10", only the upload and
download of single files is possible.

Report Card for "Google Drive" (continued)

- From the "Google Chrome" Web browser, you can download and upload local folders of data files to the "Google Drive" server farm.
- From most other Web browsers, you can install a Google-provided "Java-based folder upload applet" that will enable the upload of local data files to the "Google Drive" server farm.

Using the "Google Chrome" browser to upload folders or files from your local computer to the "Google Drive" server farm:

Using the "Google Chrome" browser to download folders or files from the "Google Drive" server farm to your local computer:

Report Card for "Google Drive" (continued)

- When you use a Web browser to download a file from the "Google Drive" server farm: the "Google Drive" server farm zips the folder before sending it to the "Downloads" folder of your computer.

Report Card for "Google Drive" (continued)

- The "Google Chrome" browser has the added benefit of allowing offline access to all files stored at the "Google Drive" server farm, even when you do not have an Internet connection. See

<http://support.google.com/drive/bin/answer.py?hl=en&answer=2375012&topic=2375002&ctx=topic>

Report Card for "Google Drive" (continued)

- The "Start" screen version of Internet Explorer 10 (= "Metro IE10") of "Windows 8" **does not allow the upload of a folder with Google Drive's java browser applet:** You can only upload a single file at a time.

Report Card for "Google Drive" (continued)

- The "Start" screen version of Internet Explorer 11 (= "Metro IE11") of "Windows 8.1" **does not allow the upload of a folder with Google Drive's Java browser applet**: You can only upload a single file at a time.

Report Card for "Google Drive" (continued)

- "Google Drive" does not have a "Windows Store App" for the new "Start Screen" of "Windows 8" (while "OneDrive" and "Box" both provide free "Windows Store Apps" for the "Start" screen of "Windows 8")

Report Card for "Google Drive" (continued)

- "Google Drive" displays all 3-character file extensions (unlike "OneDrive" which does not display 3-character file extensions which can confuse the end-user).

Using the "Desktop" version of the Internet Explorer 10" browser (in "Windows 7" and "Windows 8") to upload folders or files from your local computer to the "Google Drive" server farm:

Google will not let you download their "Google Drive.." software until you log in with your Google account!:

The screenshot shows a web browser window with the Google Drive Help page. The address bar shows the URL <http://support.google.com/drive/bin/answer.py?hl=en&ans>. The page title is "Google Drive". The navigation bar includes links for Home, Features, Download, Apps, and Help, along with a "Go to Google Drive" button. The breadcrumb trail reads: Help home > Get Started > Get started with Google Drive > Google Drive for your Mac/PC. The main heading is "Get started with Google Drive" followed by "Install Google Drive on your Mac/PC". A "Next: System requirements" button is visible. The text states: "Step-by-step installation instructions for Windows and Mac. You can install Google Drive for your Mac/PC as soon as you have access to Google Drive on the web." A "Windows" section is expanded, showing a list of six steps for installation. The left sidebar contains a "Get Started" section with links to "Overview of Google Drive", "Google Drive on the web", and "Google Drive for your Mac/PC". Under "Google Drive for your Mac/PC", there are links for "About Google Drive for your Mac/PC", "Install Google Drive on your Mac/PC" (highlighted in red), "System requirements", "Sync files and folders", and "Organize your files into folders". The right sidebar shows a "Related" section with various links.

Next: System requirements

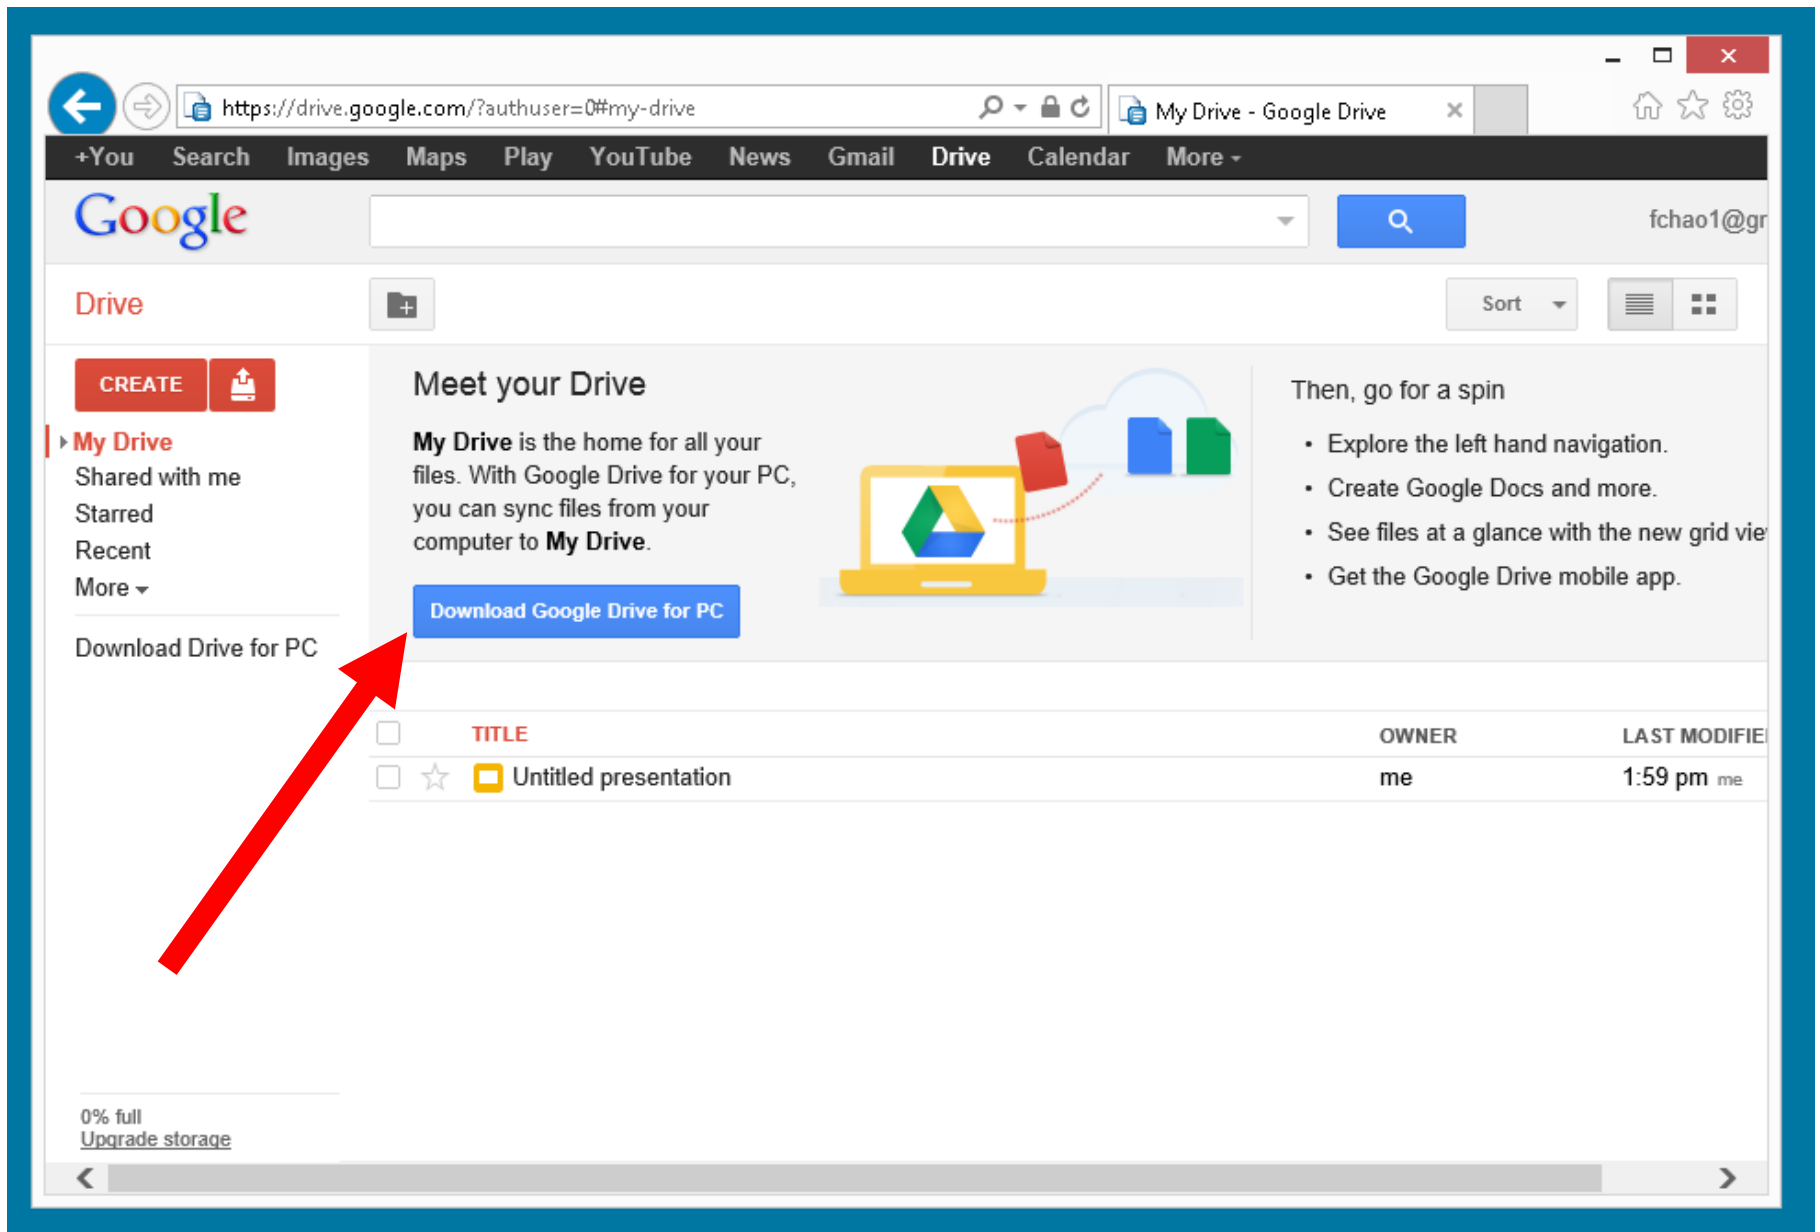

Step-by-step installation instructions for Windows and Mac.

You can install Google Drive for your Mac/PC as soon as you have access to Google Drive on the web.

Windows

1. Go to <http://drive.google.com>.
2. Click the **Download Google Drive** for your PC button.
3. Open **googledrivesync.exe** to automatically install and start Google Drive on your PC. (You may receive a warning that Google Drive is an application downloaded from the Internet. Click the **Open** button.)
4. Enter your **Google Account username** and **password** in the window that opens. This will be the account associated with Google Drive for your PC.
5. Complete the installation package instructions.
6. Launch Google Drive for your PC from the Start menu. Drag files and folders into your Google Drive folder to begin syncing items to **My Drive** (part of Google Drive on the web).

Meet your Drive

My Drive is the home for all your files. With Google Drive for your PC, you can sync files from your computer to **My Drive**.

Francis Chao's Presentations for the APCUG Speakers Bureau

Francis Chao is prepared to present any of the following programs to your User Group:

- [Secure Web Access Using a Two-Router Demilitarized Zone \(DMZ\) and a "VMware" Virtual Machine](#) (B)

From inside a "VMware" virtual machine that connects with a USB-to-Gigabit Ethernet adapter to a two-router "De-Militarized Zone" (DMZ), you can access the Internet with the maximum amount of protection from malware.

This unique virtual machine configuration resolves two problems:

- Problem 1:

Free Evaluation
Valid for 62 days
Build 9200

Report Card for "Google Drive" (continued)

- If you create a new document, spreadsheet, or presentation, Google Drive will store the new file in its own proprietary format.
- If you then download this file down to your a local hard drive of your computer, you will have to select the format that you want to file to be downloaded as.

Google Drive (continued)

- For viewing and editing:
 - .PDF files open for viewing in the "Google Docs" Web-based service.
 - .DOC files open for viewing and editing in the "Google Docs" Web-based service.
 - .XLS files open for viewing and editing at the "Google Sheets" Web-based service.
 - .PPT files open for viewing and editing in the "Google Slides" Web-based service.
 - .PPTX files open for viewing and editing at the "Google Sheets" Web-based service..

Report Card for "Google Drive" (continued)

- If you upload a .doc, .docx, .xls, .xlsx, or a .pptx file to the server farm of "Google Drive" and then you use "Google Docs", "Google Sheets", or "Google Slides" to edit the file, "Google Docs" will create a new file that is minus the file extension.

Report Card for "Google Drive" (continued)

- Each time that you edit the original .doc, .docx, .xls, .xlsx, or .pptx file, "Google Docs", "Google Sheets", or "Google Slides", you will create another file that is minus the file extension. These files will have the same name but will have a different "Last Modified" date and time.

Report Card for "Google Drive" (continued)

- The "Google Docs" proprietary format for documents is called .gdoc

A .gdoc file (that is located in the "Google Drive" folder in your PC or Mac) is actually a shortcut that points to the location of the actual file up at the "Google Docs" server farm.

Report Card for "Google Drive" (continued)

- The "Google Docs" proprietary format for spreadsheets is called .gsheet

A .gsheet file (that is located in the "Google Drive" folder in your PC or Mac) is actually a shortcut that points to the location of the actual file up at the "Google Docs" server farm.

Report Card for "Google Drive" (continued)

- The "Google Docs" proprietary format for presentation files is called .gslides

A .gslides file (that is located in the "Google Drive" folder in your PC or Mac) is actually a shortcut that points to the location of the actual file up at the "Google Docs" server farm.

Report Card for "Google Drive" (continued)

- The three "Google Docs" proprietary formats store "revision history" that lets you see how the file looked at a previous point in time. See <http://support.google.com/drive/bin/answer.py?hl=en&answer=190843>

Web-based File Creation, Editing, and Viewing in "Google Drive" (continued)

- The "Connect more apps" selection option lets you start up many more online Web-based services for file creation, editing, and viewing:

Appendix 1

Google's Claim of 15 Gigabytes of Free Storage is Slightly Misleading

- Google's Web page at <https://tools.google.com/dlpage/drive> states you you get 15 Gigabytes of free space. However you actually get 5 Gigabytes of free storage for "Google Drive"
5 Gigabytes of free storage for "Gmail"
and
5 Gigabytes of free storage for "Google+ photos".

Additional Information about Google Drive

- See
<http://support.google.com/drive/?hl=en>
and
<http://www.gcflearnfree.org/googledriveanddocs>
and
