SUMMARY

Unlike in previous years, powerful and free software for editing video files is now available for all computer operating systems: Windows.., macOS, and ..Linux..

Here is a quick overview of what is available.

FREE VIDEO EDITING APPS FOR "WINDOWS.." COMPUTERS

- "Microsoft Clipchamp" for "Windows 11" and "Windows 10"

- "Kdenlive" is a "Free and Open Source" full-featured video editor that runs well in "Windows.."

FREE VIDEO EDITING APPS FOR "macOS" COMPUTERS

- "iMovie" has been bundled with all "macOS" computers since "Mac OS 8" in 1999

- "Kdenlive" is a "Free and Open Source" full-featured video editor that runs in "macOS" (and "Windows.." and "Linux")

- "Microsoft Clipchamp" for the "Google Chrome" Web browser or the "Microsoft Edge" Web browser running inside "macOS"

FREE VIDEO EDITING APPS FOR "..LINUX" COMPUTERS

- "Kdenlive" is a "Free and Open Source" full-featured video editor that runs in ..Linux (and "Windows.." and "macOS")

- "Microsoft Clipchamp" for the "Google Chrome" Web browser or the "Microsoft Edge" Web browser runs well inside ..Linux
