SUMMARY

"Kdenlive" is available as a conventional totally-free locally-installed app in Windows.., macOS, and ..Linux..

"KDENLIVE"

- "Kdenlive" is an acronym that stands for "KDE Non-linear Video Editor."
- Originally developed in 2002 by Jason Wood of the United Kingdom
- "Kdenlive" is totally "Free and Open Source": There is just one version of this app and this full-featured single version is totally free.

OUR TWO-PAGE REPORT
CARD FOR
"Kdenlive":

"Kdenlive" in Windows 11 or 10, Page 1 of 2

Can import .MP4 video files into the time line	Yes
Can import .WMV video files into the time line	Yes
Can import .MOV video files	Yes
Can import .JPG photo files into the time line	Yes
Can split a timeline into two or more separate segments	Yes
Can separate the audio part of a video segment from the video part	Yes
Can boost the audio level of a time line segment by at least 100 percent?	Yes

"Kdenlive" in Windows 11 or 10, Page 2 of 2

Can adjust the brightness of the video of a time line segment	Yes
Can adjust the contrast of the video of a time line segment	Yes
Can perform a rectangular crop on the video of a time line segment	Yes

INSTALLING "KDENLIVE" (continued)

- The "Installable" version of "Kdenlive" edits the "Windows Registry" while the "Standalone" version does not.

INSTALLING "KDENLIVE" (continued)

- The "Installable" version of "Kdenlive" is a conventional "desktop app" (= *.exe) which takes up 98 Megabytes of drive space on a "Windows.." computer. Its executable is
C:\Program
Files\kdenlive\bin\kdenlive.exe

INSTALLING "KDENLIVE" (continued)

- The "Standalone" version of "Kdenlive" is a "portable app" which takes up 492 Megabytes of drive space in a folder called **kdenlive-23.04.3_standalone**
This folder can be placed anywhere and moved anywhere in a "Windows.." computer.

INSTALLING "KDENLIVE" (continued)

- The "Standalone" version cannot be downloaded from inside "Microsoft Edge" but it downloads fine from other Web browsers in a "Windows.." computer computer.

INSTALLING "KDENLIVE" (continued)

- Because of the massive size difference between the "Installable" version and the "Standalone" version, we recommend that you install the "Installable" version.

Kdenlive -
Shortcut

KDENLIVE "PROJECT FILES"

- For each "project" that you create in "Kdenlive", it stores a "project file" at C:\\Users\\<your Windows user name\\Videos\\<name of Kdenlive project>.kdenlive

KDENLIVE "EXPORTED" VIDEO FILES

- When you export (="render" = "output") from a "Kdenlive" project, it stores a rendered video file at C:\\Users\\<your Windows user name\\Videos\\<name of Kdenlive project>.<3-character video file extension>

STARTING "KDENLIVE"

- To start "Kdenlive" in Windows.., you will find it in the "Start Menu"
- To make a desktop shortcut to "Kdenlive" in "Windows 10.." or "Windows 11..", right-click on the "Start" button, left-click on "Run", type in
shell:appsfolder
left-click on "OK"
right-click on "Microsoft Clipchamp,
and left-click on "Create shortcut"

Microsoft
Clipchamp...

DRAGGING MEDIA FILES FROM PROJECT BIN TO TIMELINE

- When dragging a media clip from the "Project Bin" to the time line, drop the media clip into the "V1" time line.
- If you drop the media clip into the "V2" time line, the video time line and the audio time line of the media clip will be too far apart vertically and this may be too confusing for you.

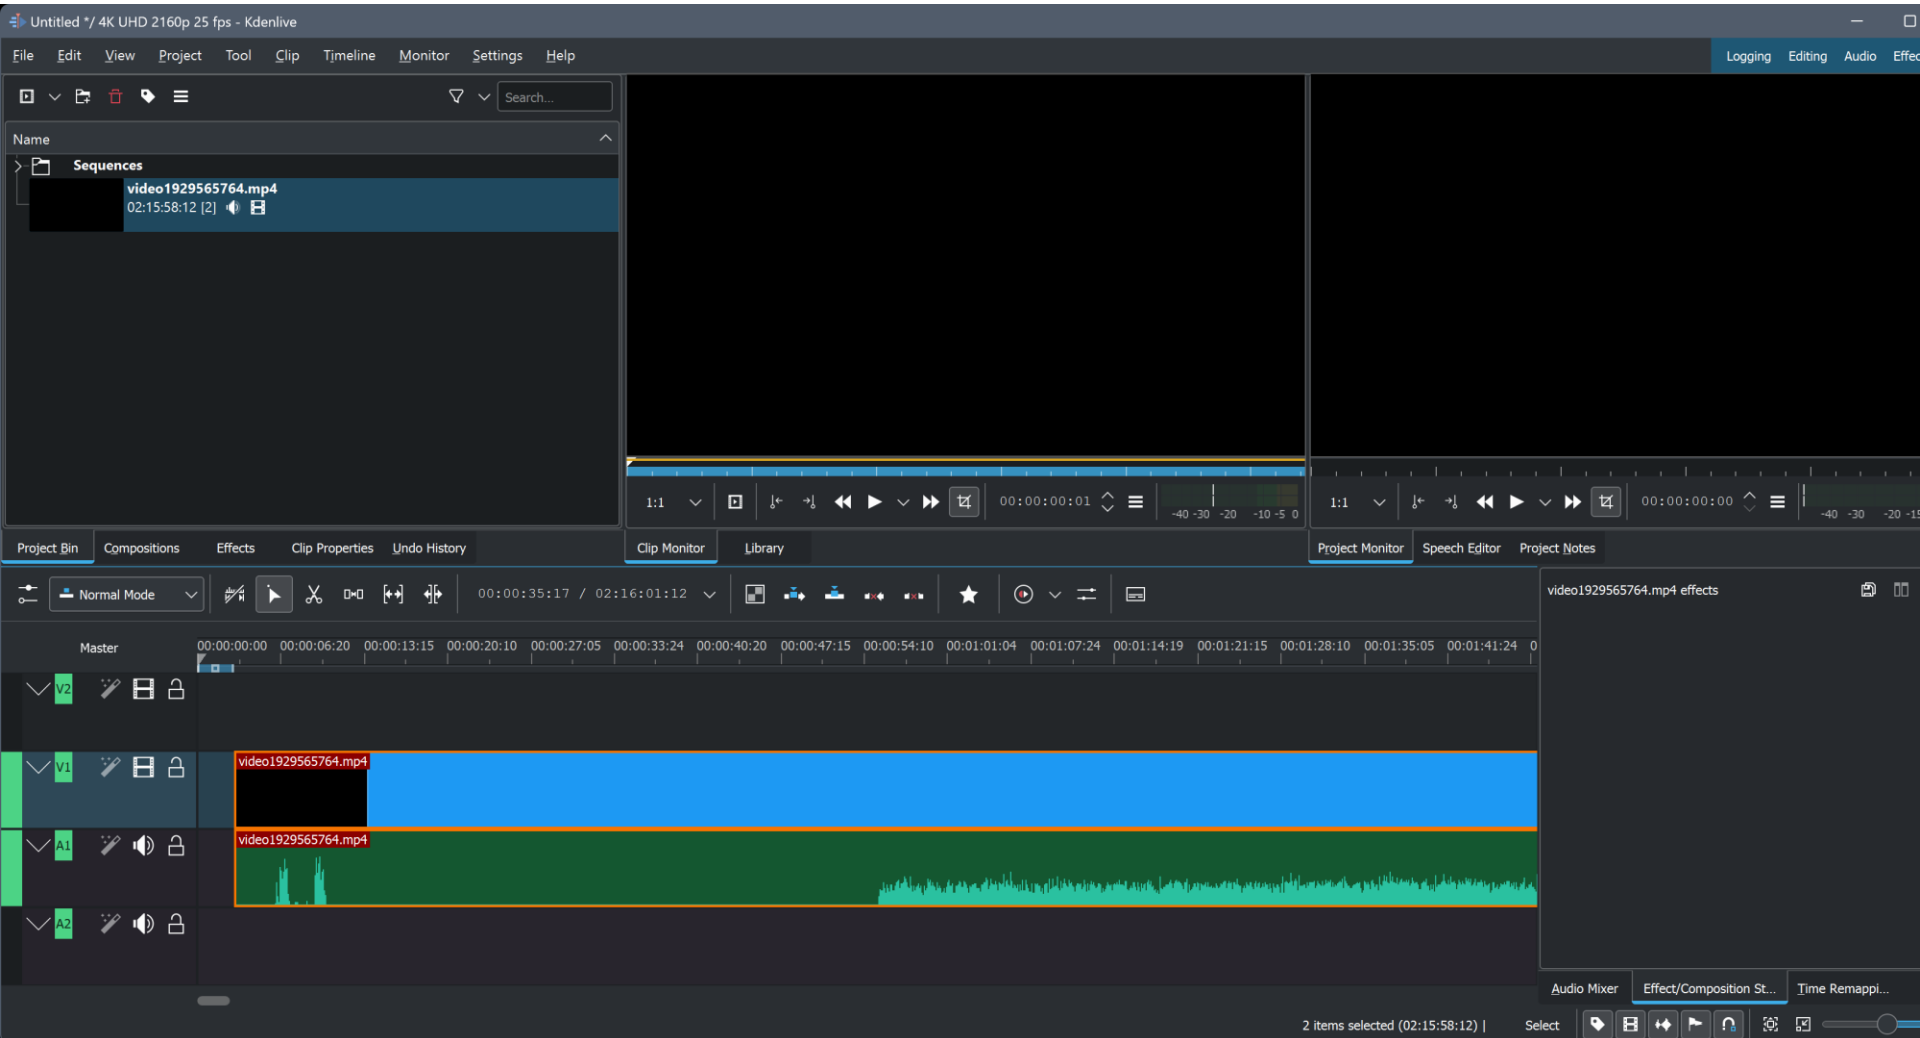

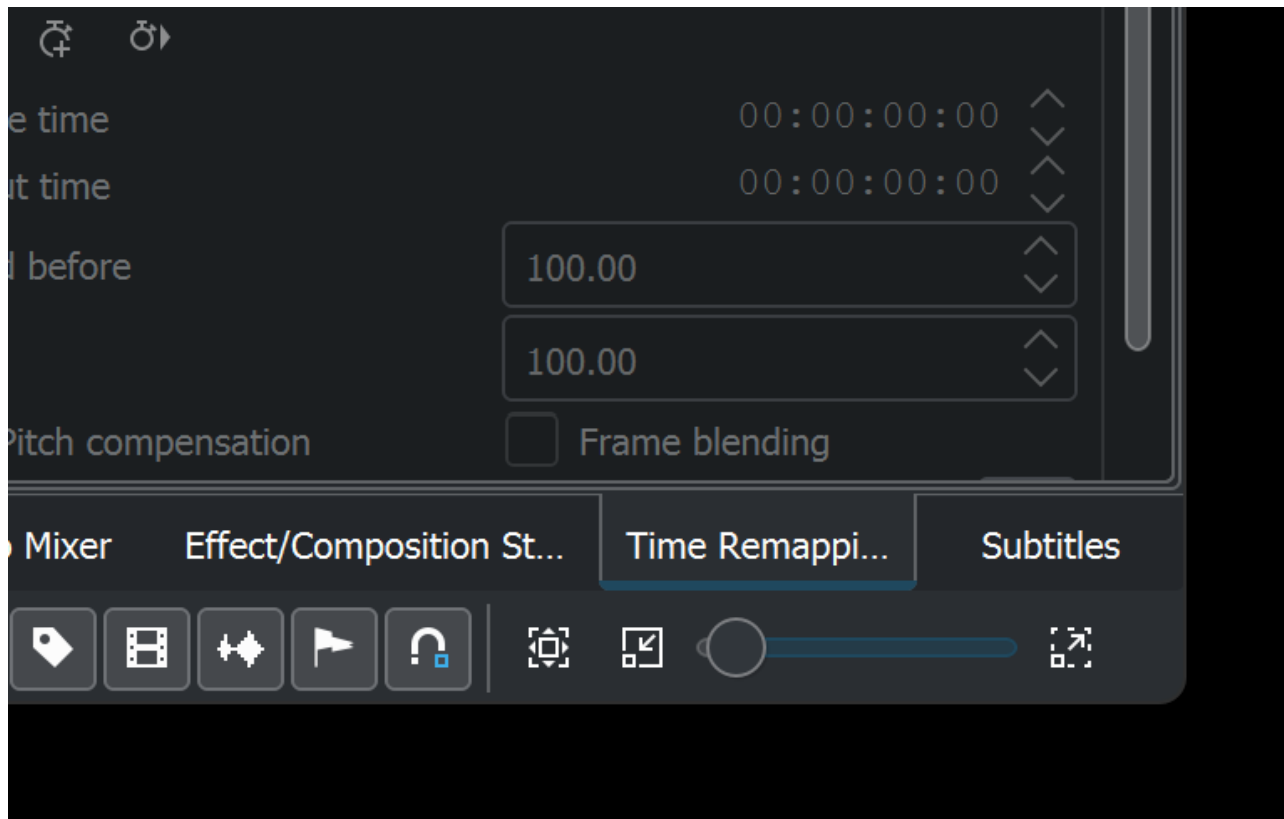

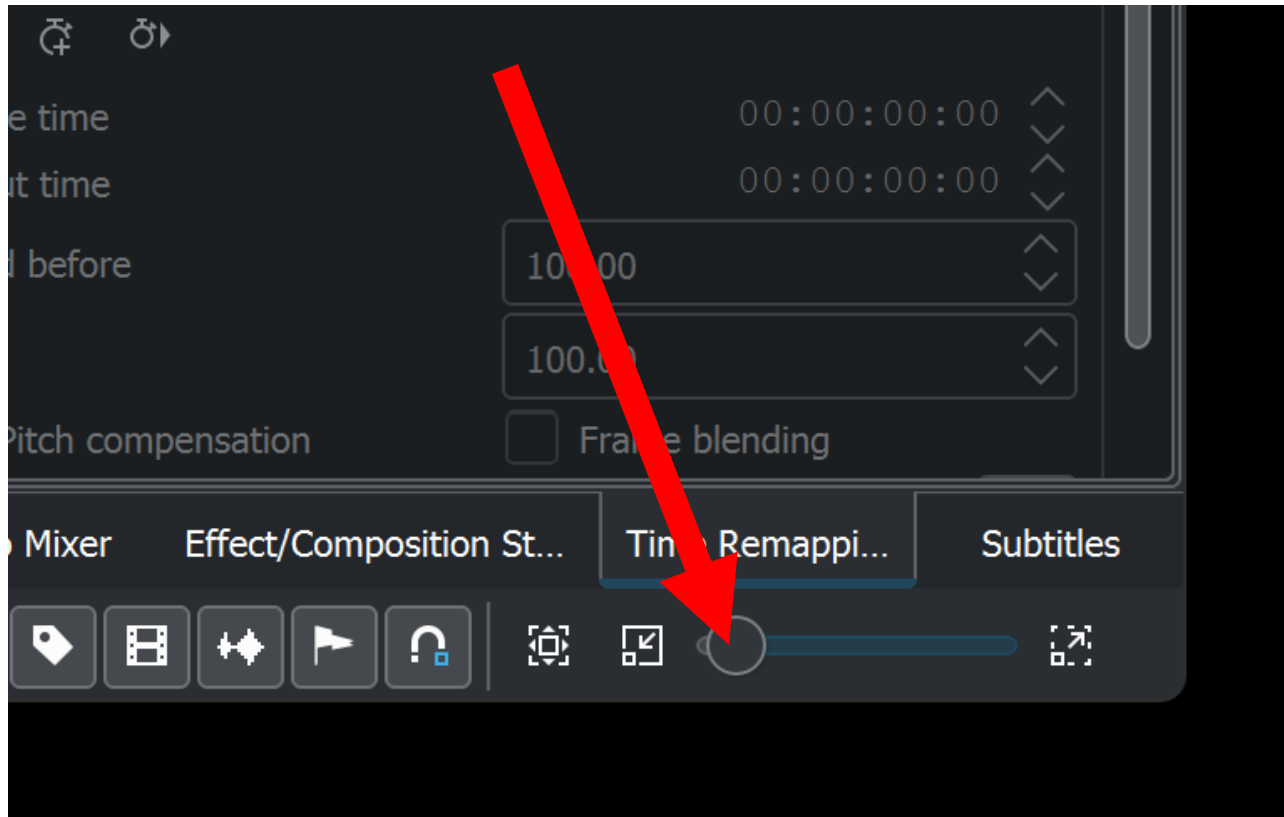

DRAGGING MEDIA FILES FROM PROJECT BIN TO TIMELINE (continued)

- Use the "Time Remapping" slider near the lower-right corner of the "Kdenlive" window to zoom in and out of the timeline:

Untitled */ 4K UHD 2160p 25 fps - Kdenlive

DRAGGING MEDIA FILES FROM PROJECT BIN TO TIMELINE

(continued)

- When you drag a video clip from the "Project Bin" to the timeline, "Kdenlive" will place the video of the video clip and the audio clip of the video in separate timeline channels. This is a time saver since in most other video editing apps, you have to do a right-click on the video clip to get this to happen.

DRAGGING MEDIA FILES FROM PROJECT BIN TO TIMELINE (continued)

- If you do not need the "V2" and "A2" timelines, right-click on any time line. Then click on "Delete track".
Then use the pop-up dialog box to delete the "V2" and "A2" time lines.
