“Meeting Notes”

# EXECUTIVE SUMMARY

By adding a low-cost USB GPS device to a "Windows.." PC and then running the free "BSGPS" software program, you can turn your computer into a useful GPS device that displays your location on various online and off-line maps.

# TOPICS

- GPS USB receivers for your "Windows.." computer
- GPS software for your "Windows.." computer
- Installation advice for operating GPS receivers in a "Windows.." computer

# “GlobalSat” USB Receiver

- [http://www.amazon.com/GlobalSat-BU-353-USB-Navigation-Receiver/dp/B000PKX2KA/ref=sr\\_1\\_fkmr0\\_1?ie=UTF8&qid=1364461393&sr=8-1-fkmr0&keywords=GPS+USB+U-blox](http://www.amazon.com/GlobalSat-BU-353-USB-Navigation-Receiver/dp/B000PKX2KA/ref=sr_1_fkmr0_1?ie=UTF8&qid=1364461393&sr=8-1-fkmr0&keywords=GPS+USB+U-blox)

## “BSGPS” for “Windows..” (continued)

- You can set “BSGPS” to download “map tiles” from a variety of familiar sources on the Web:

# “BSGPS” for "Windows.." (continued)

49 of 53 people found the following review helpful

★★★★★ **Fast locking in on Location, Very nice** May 2, 2009

By [Jeff G.](#)

This is the fastest lock GPS device I have used, and I have used about a dozen. One thing though-I was having trouble with it crashing my Vista laptop after a couple hours of use. I Solved this by going to Control Panel->Hardware and Sound->Device Manager->Under Ports->Select Properties of Prolific USB-to-Serial...->Port Settings->Change Flow Control to Hardware then->Select Advanced->Change both buffers to 1. And that totally solved the blue screen issue I was having.

Great product, best available USB GPS.
