# SUMMARY

The "Zinwell NextGen TV Box" is about \$150 and it that can receive all three types of "ATSC" TV channels.

# TOPICS

- Step 1: Procuring the "Zinwell NextGen TV Box"
- Step 2: Installing it.
- Step 3: Using it.

## STEP 1: PROCURE TUNER

- To purchase the "Zinwell NextGen TV Box", you can go to <https://www.channelmaster.com/products/nextgen-tv-receivers-zinwell-nextgen-tv-box>

# STEP 1: PROCURE TUNER (continued)

- Warning: At the present time (April 2024), only one of Nextgen's tuner models can receive all three types of ATSC signals: Of their other tuner models only receive "ATSC 1.0" (Type 1) channels

## STEP 2: INSTALL TUNER-

- Install the antenna in a window
- Install a RG6 coaxial cable from the antenna to the tuner box
- Connect the tuner box's HDMI port to the HDMI port on a computer monitor or a TV set
- Power up the tuner and scan for TV channels.

# IR Remote Control

## Instructions for the learning function

Learning Keys: TV Mute, TV POWER, TV VOL+, TV VOL-, TV Yellow, TV Green

1. Long press the "POWER" button in the TV area for about 3 seconds, and the indicator light will change from off to long on, indicating that it has entered the learning state;
2. Then short press the button that needs to be learned in the learning area, such as power, and the indicator light will change from solid to slow flashing;
3. Aim the transmitting end of the TV remote control to be learned at the transmitting end of the remote control (about 3~5cm), and short press the learned button of the TV remote control. After the signal is learned, the indicator light flashes 3 times quickly and becomes long light state;
4. Repeat steps 2 and steps 3 to learn other keys in the TV area. Press any button outside the learning area to end learning;

### Note:

1. During the learning process, if you wait for more than 10 seconds at any time, it will automatically exit the learning state.
2. During the learning process, press any button outside the learning area at any time to exit the learning state directly.
3. The two remote controllers must not shake during learning.

### Instruction of the indicators:

1. The indicator flashes when the button is sending code.
2. When entering the learning state, the indicator light is always on.
3. If the learning is successful, the indicator light flashes 3 times.

# OPTIONAL STEP 3: INSTALL AN OPTIONAL WINEGARD "BOOST XT" PRE-AMPLIFIER

- <https://www.amazon.com/Winegard-LNA-200-Preamplifier-Antenna-Amplifier/dp/B00DQN3R9O/>
