# SUMMARY

5G cellular providers are now offering "Fixed Wireless Access" to homes and businesses. At an amazingly-low price, they are starting to offer broadband-style Internet connections from their 5G cell towers to a wireless modem device that you then use as either your main or backup Internet connection.

# T-MOBILE FWA DETAILS

- Maps (from Apple):  
Updates new streets faster than the others. It was horrible in September 2012 when it was released but it is now the best navigation app that I have ever used.
