SUMMARY

If a "Quick Scan" in "Windows Security" does not remove the malware, you can use the bundled "Task Manager" to attempt to identify the malware infection

**BIG STEP 200 = USE "TASK MANAGER"
TO TRY TO IDENTIFY THE MALWARE**

BIG STEP 201:

**Use the RIGHT mouse button to click
on the "Start" button of "Windows.."**

**BIG STEP 200 = USE "TASK MANAGER"
TO TRY TO IDENTIFY THE MALWARE**

(continued)

BIG STEP 202:

**Use the LEFT mouse button to click
on "Task Manager"**

BIG STEP 200 = USE "TASK MANAGER"
TO TRY TO IDENTIFY THE MALWARE

(continued)

BIG STEP 203:

If you see a process that looks suspicious, use the RIGHT mouse button to click on it; then use the LEFT mouse button click on "End task". Then close the "Task Manager" window. Then reboot the computer to see if the malware activity resumes

BIG STEP 200 = USE "TASK MANAGER"
TO TRY TO IDENTIFY THE MALWARE
(continued)

BIG STEP 204:

If the malware activity resumes, use
"google.com", "bing.com", and
"duckduckgo.com" to search for advice
on how to deal with the malware
infection
