# SUMMARY

Here are our step-by-step instructions for using "aTube Catcher" to record streaming video at the "Graphics Device Interface" of a Windows.. computer.

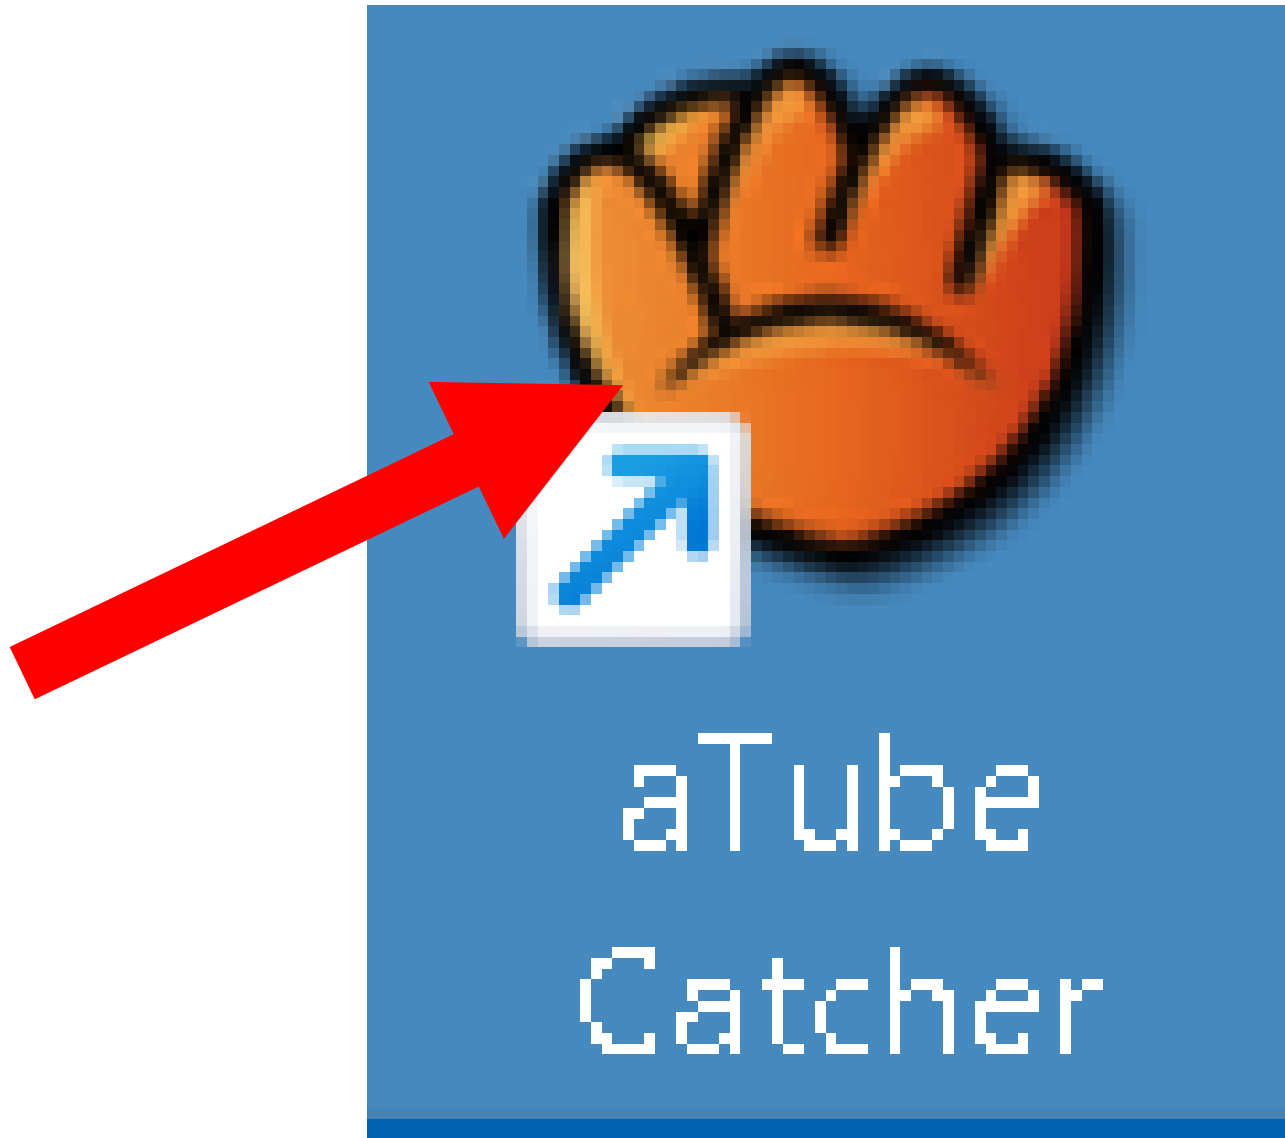

# TOPICS

- Using "aTube Catcher" to Record Streaming Video at the Graphics Device Interface
- Additional Information

- USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE
- If the "Downloader" tab is unable to download a streaming video from the network stack, you can use the "Screen Recorder" tab to record the video at the "Graphics Device Interface" instead:

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

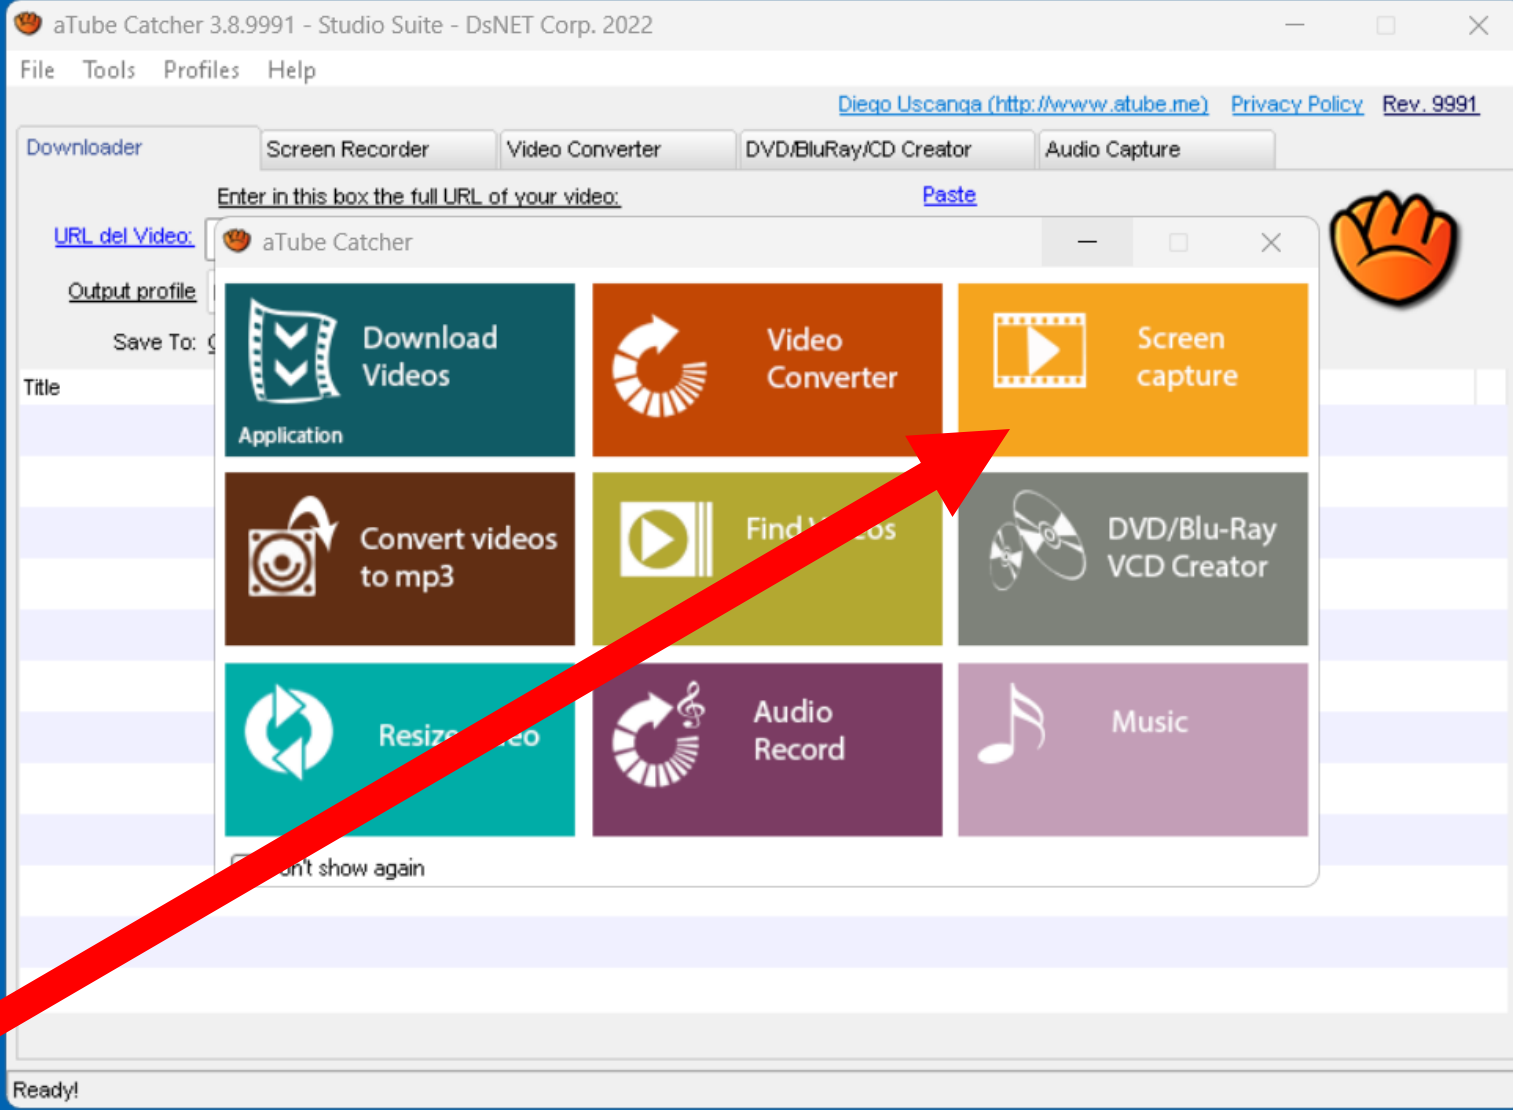

- Start "aTube Catcher" by double-clicking on the baseball catchers mitt icon:

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

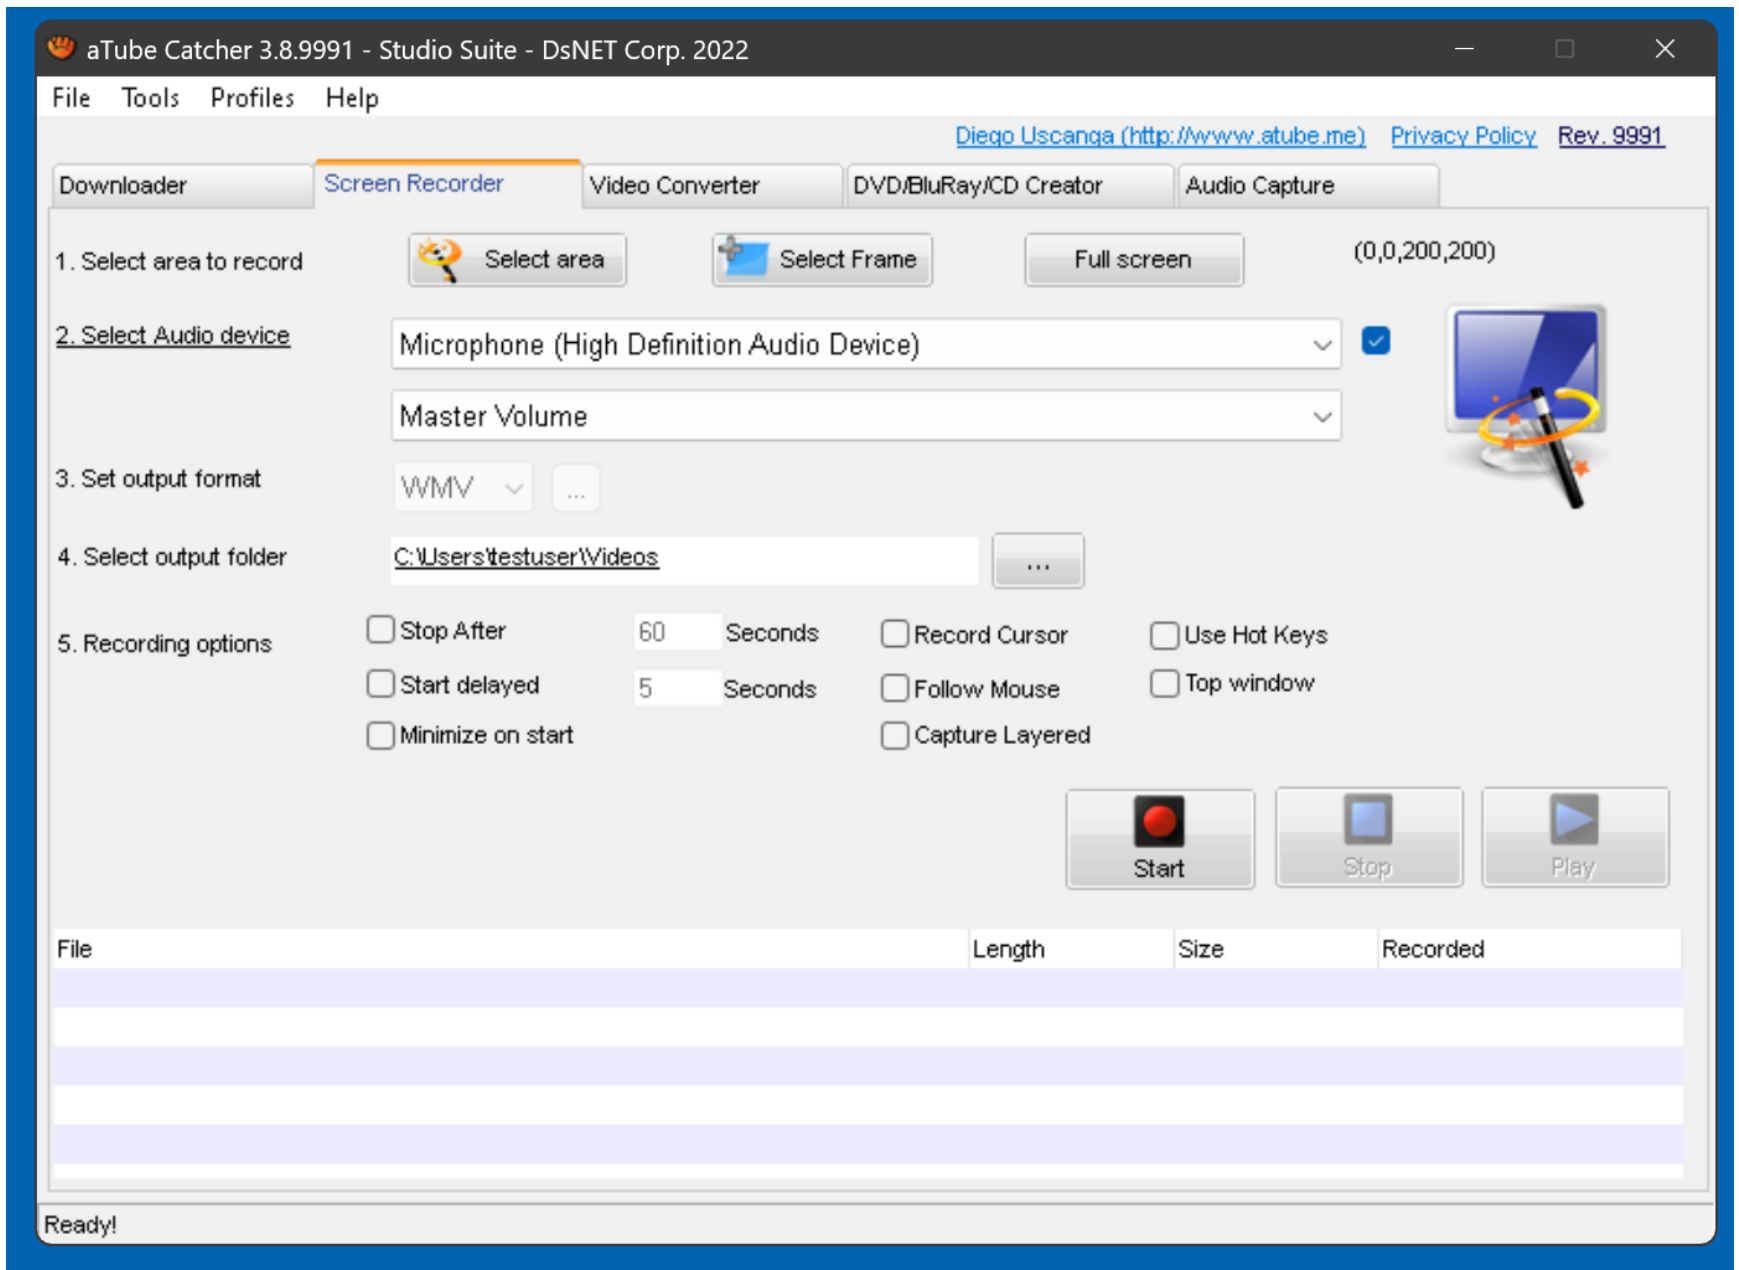

- Double-click on "Screen Capture" if a rectangular selection grid is displayed:

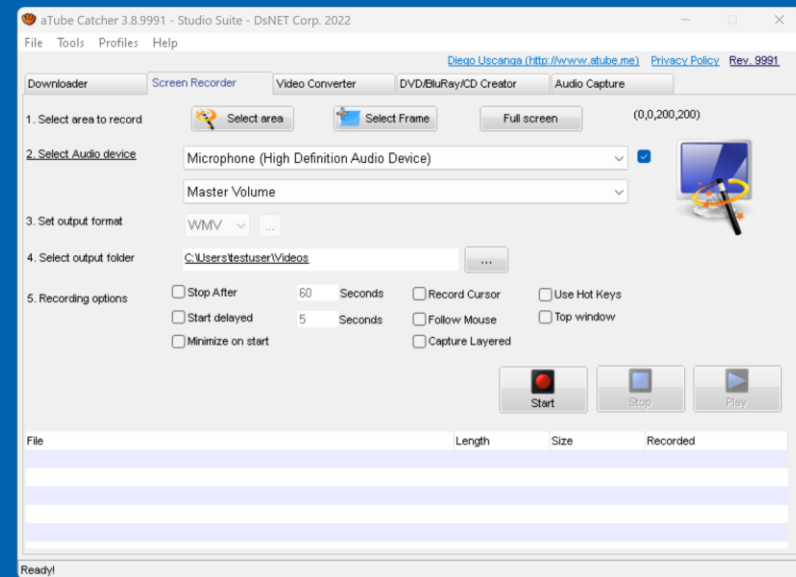

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

- The rectangular selection grid will disappear and the "Screen Recorder" tab in the "aTube Catcher" window will be displayed:

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

- Drag the "aTube Catcher" window to the right side of the monitor screen:

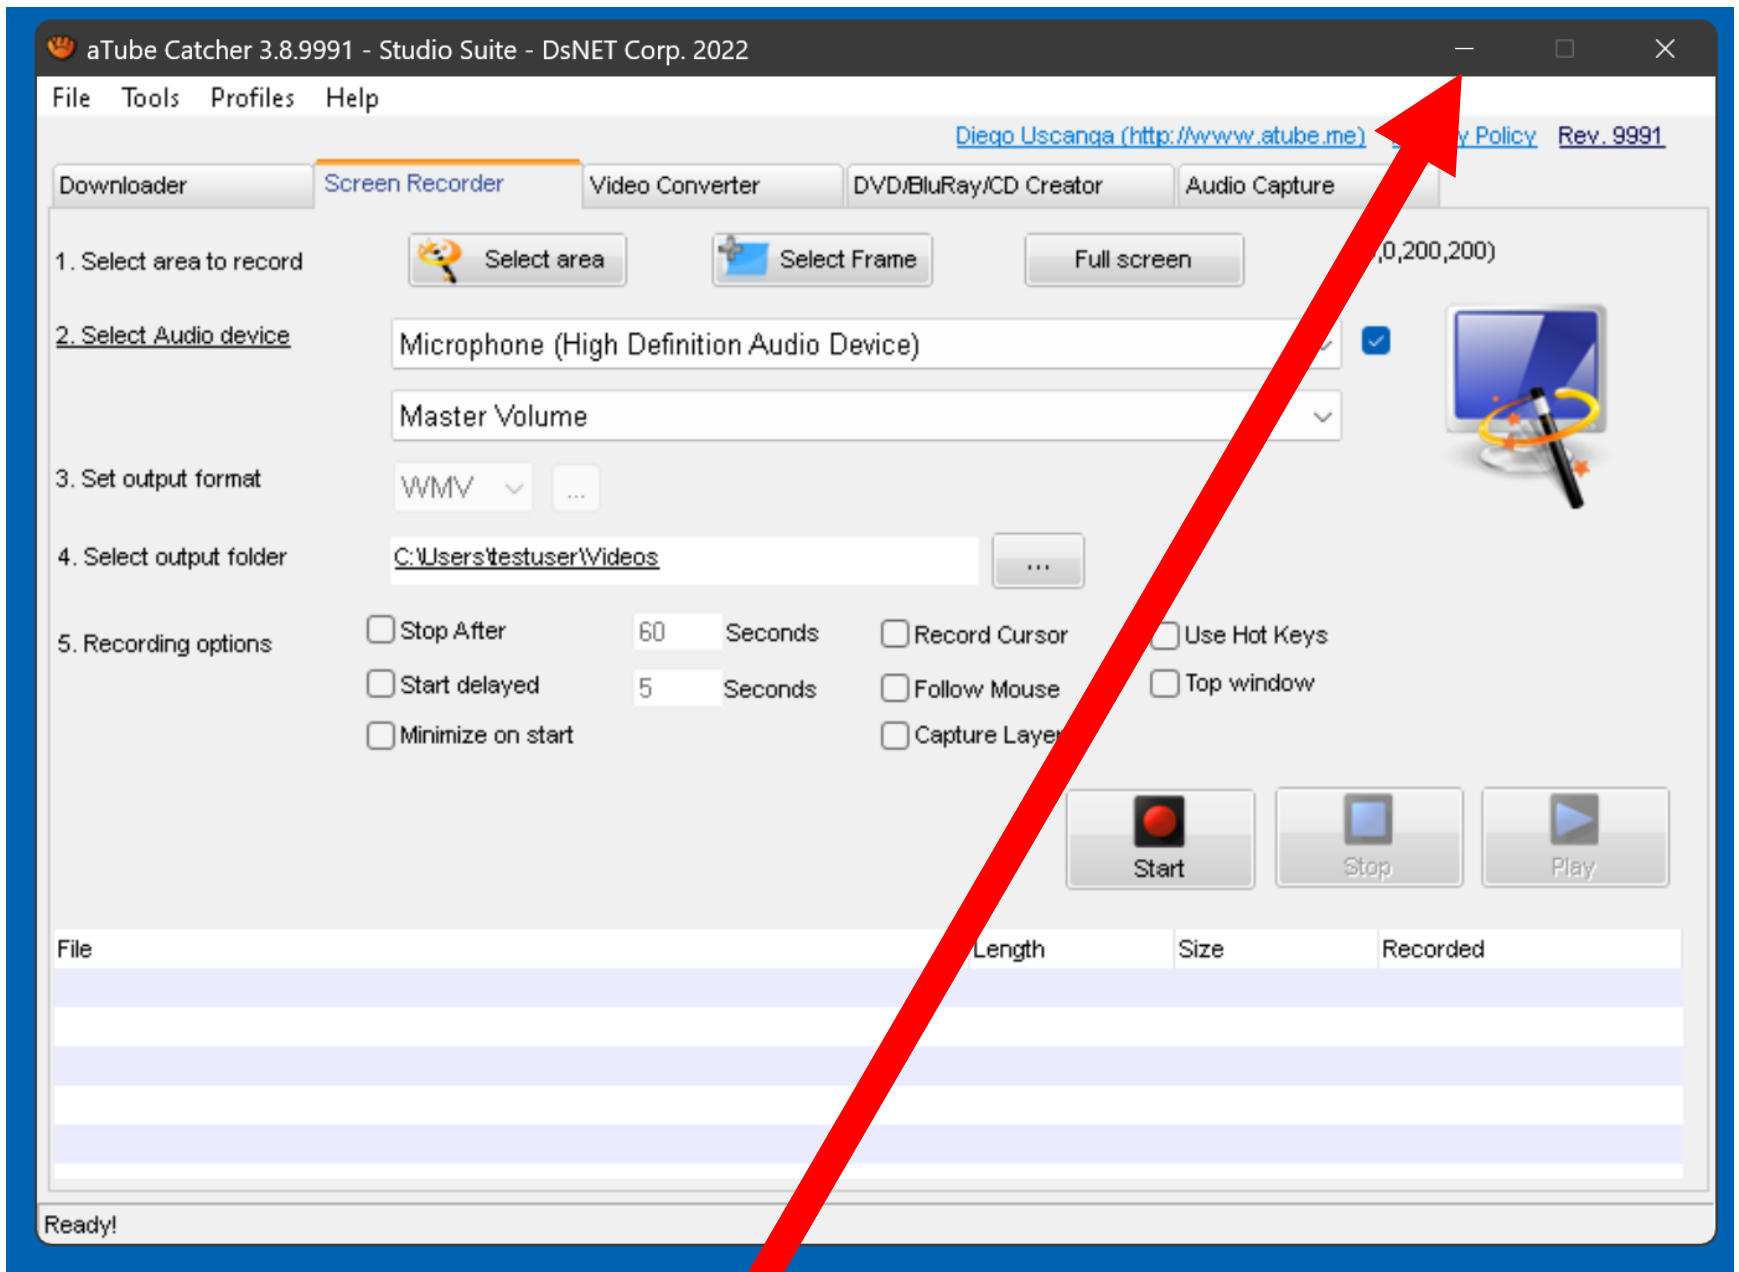

Ready!

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

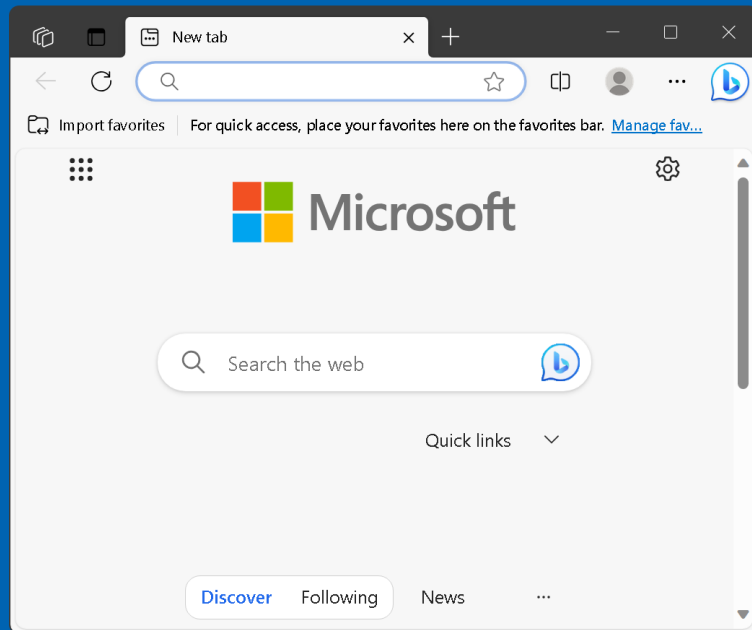

- Minimize the "aTube Catcher" window:

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

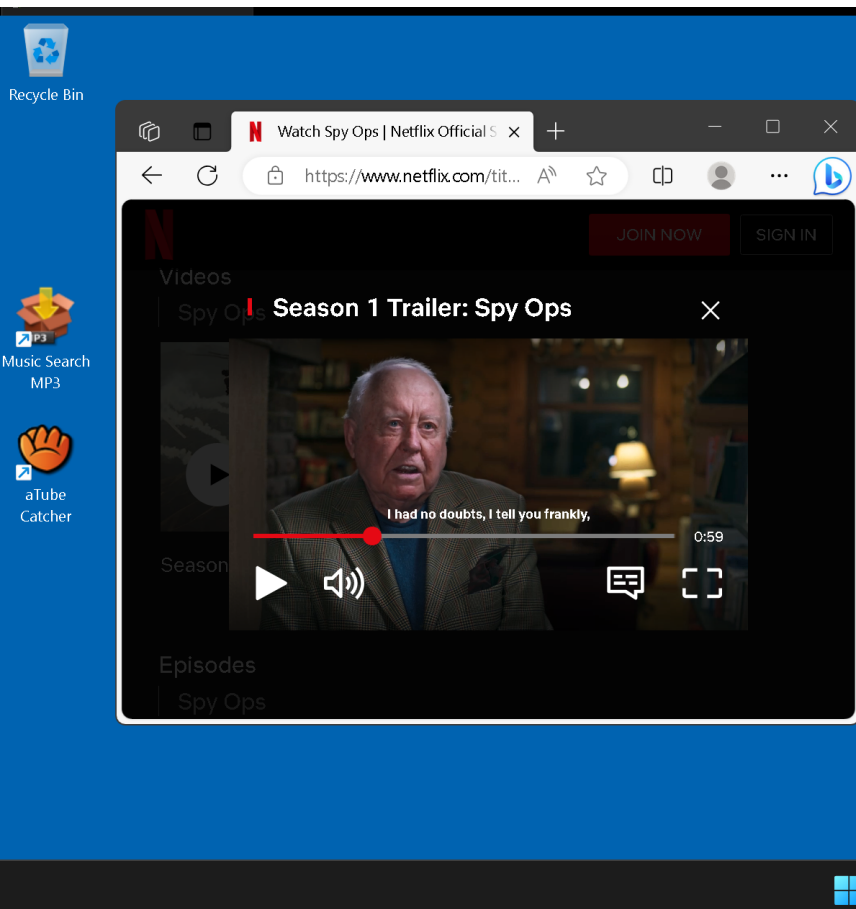

- Start a Web browser and drag it's window to the left side of the monitor screen:

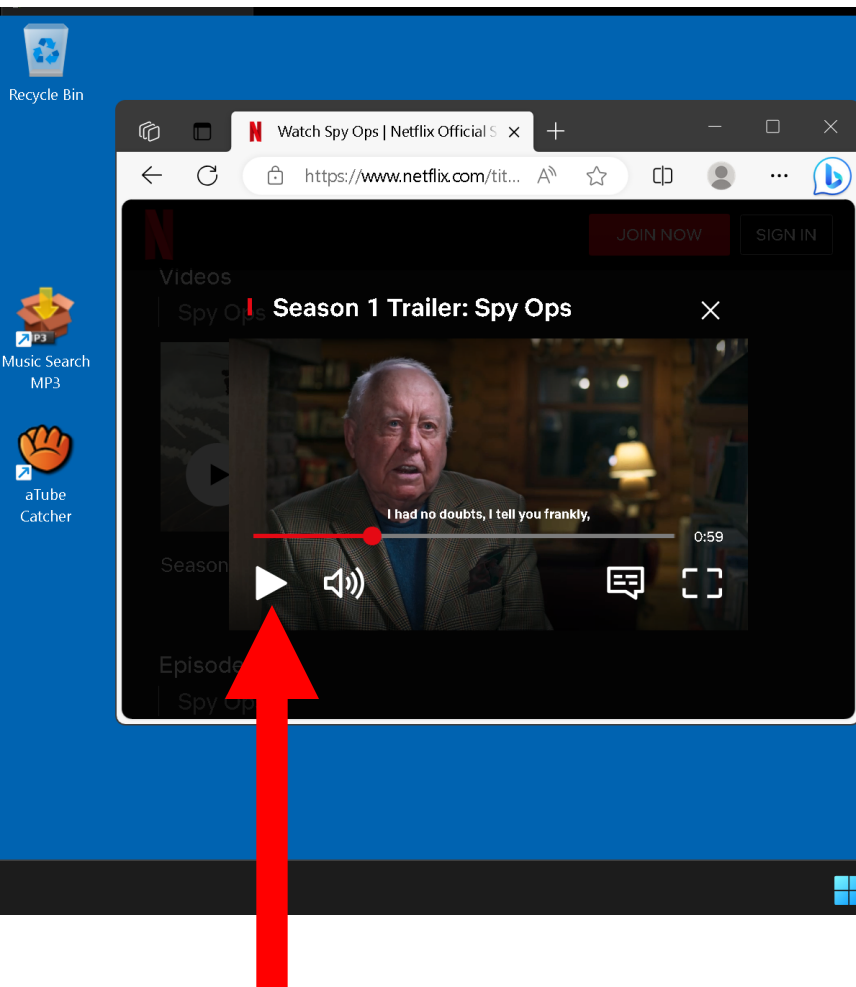

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

- Locate a streaming video that you wish to record:

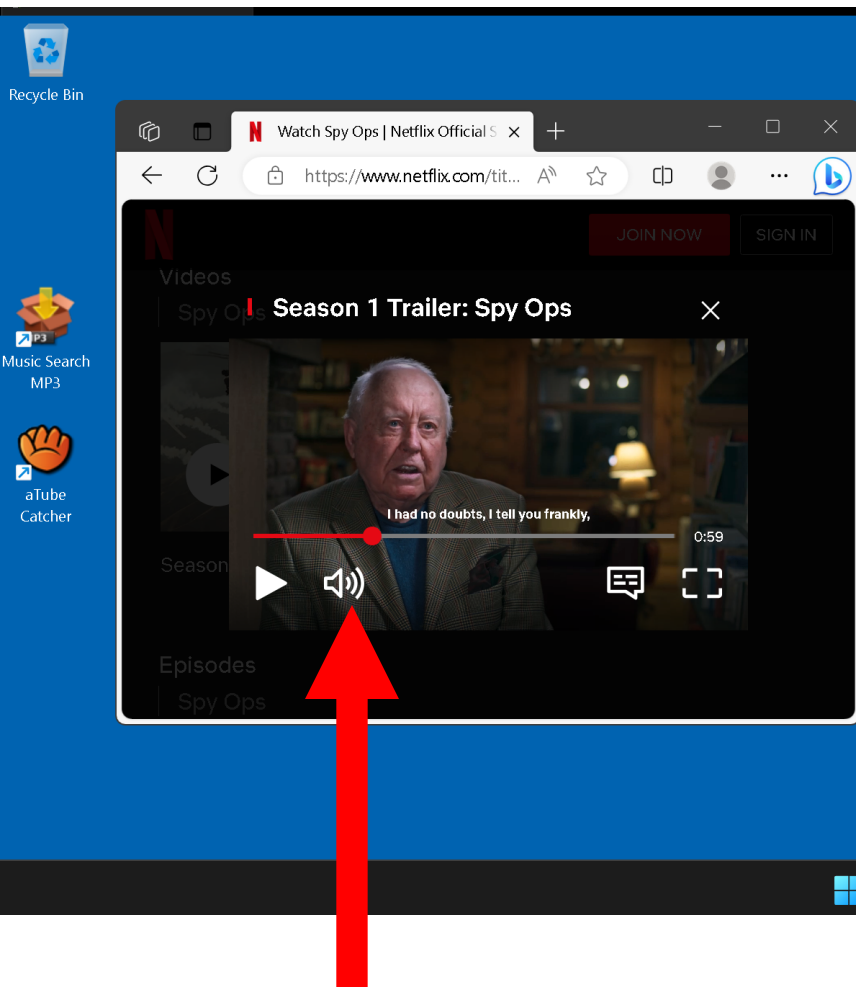

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

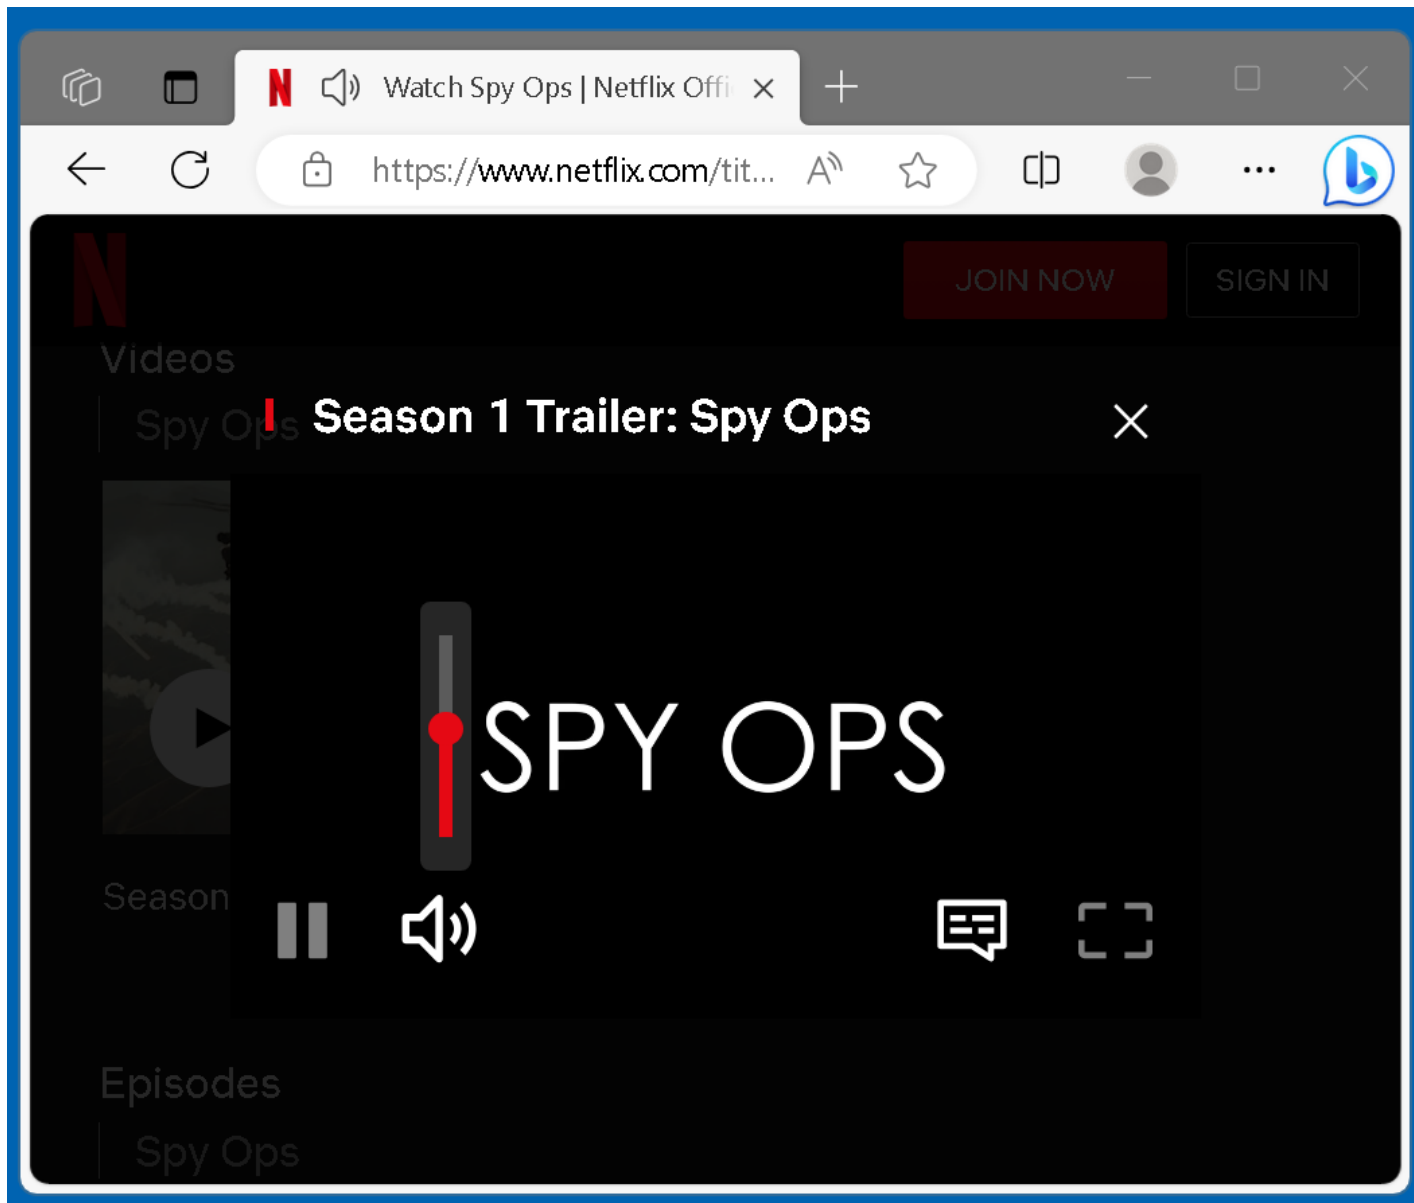

- Play the streaming video for a few seconds to get an idea of where the actual video will be displayed on the computer screen.

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

- While playing the streaming video, adjust the audio level:

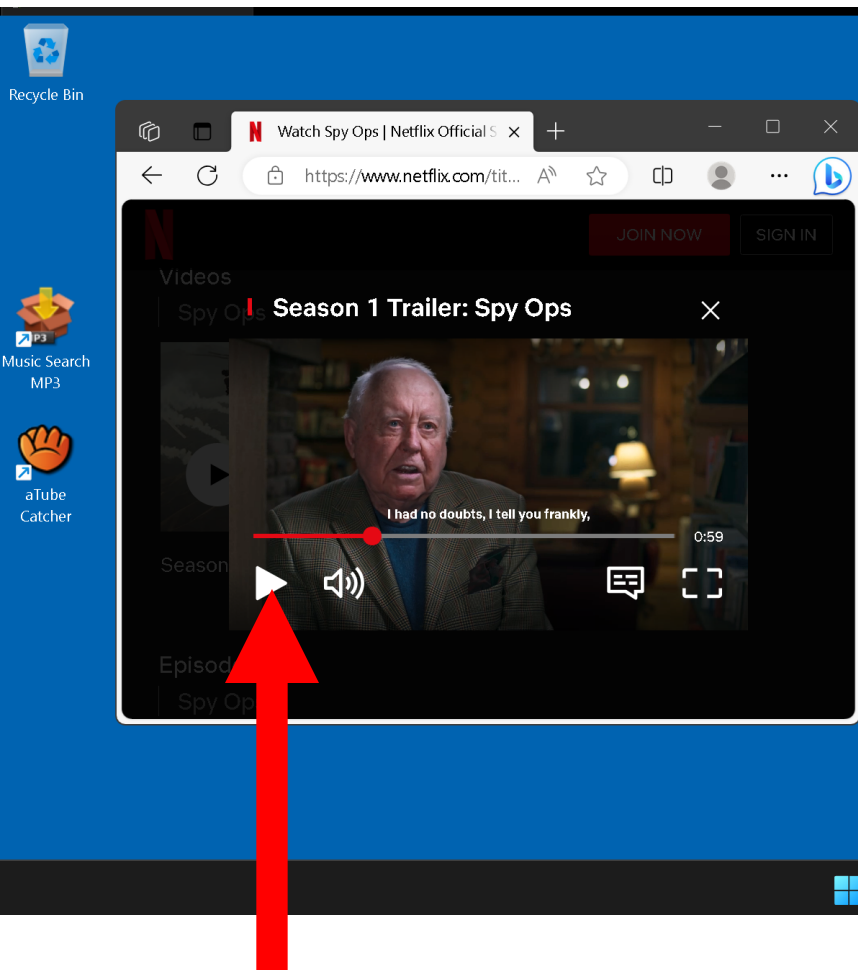

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

- Stop the playing of the video and return the start indicator of the player to the start of the time line.

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

- Restore the "aTube Catcher" window:

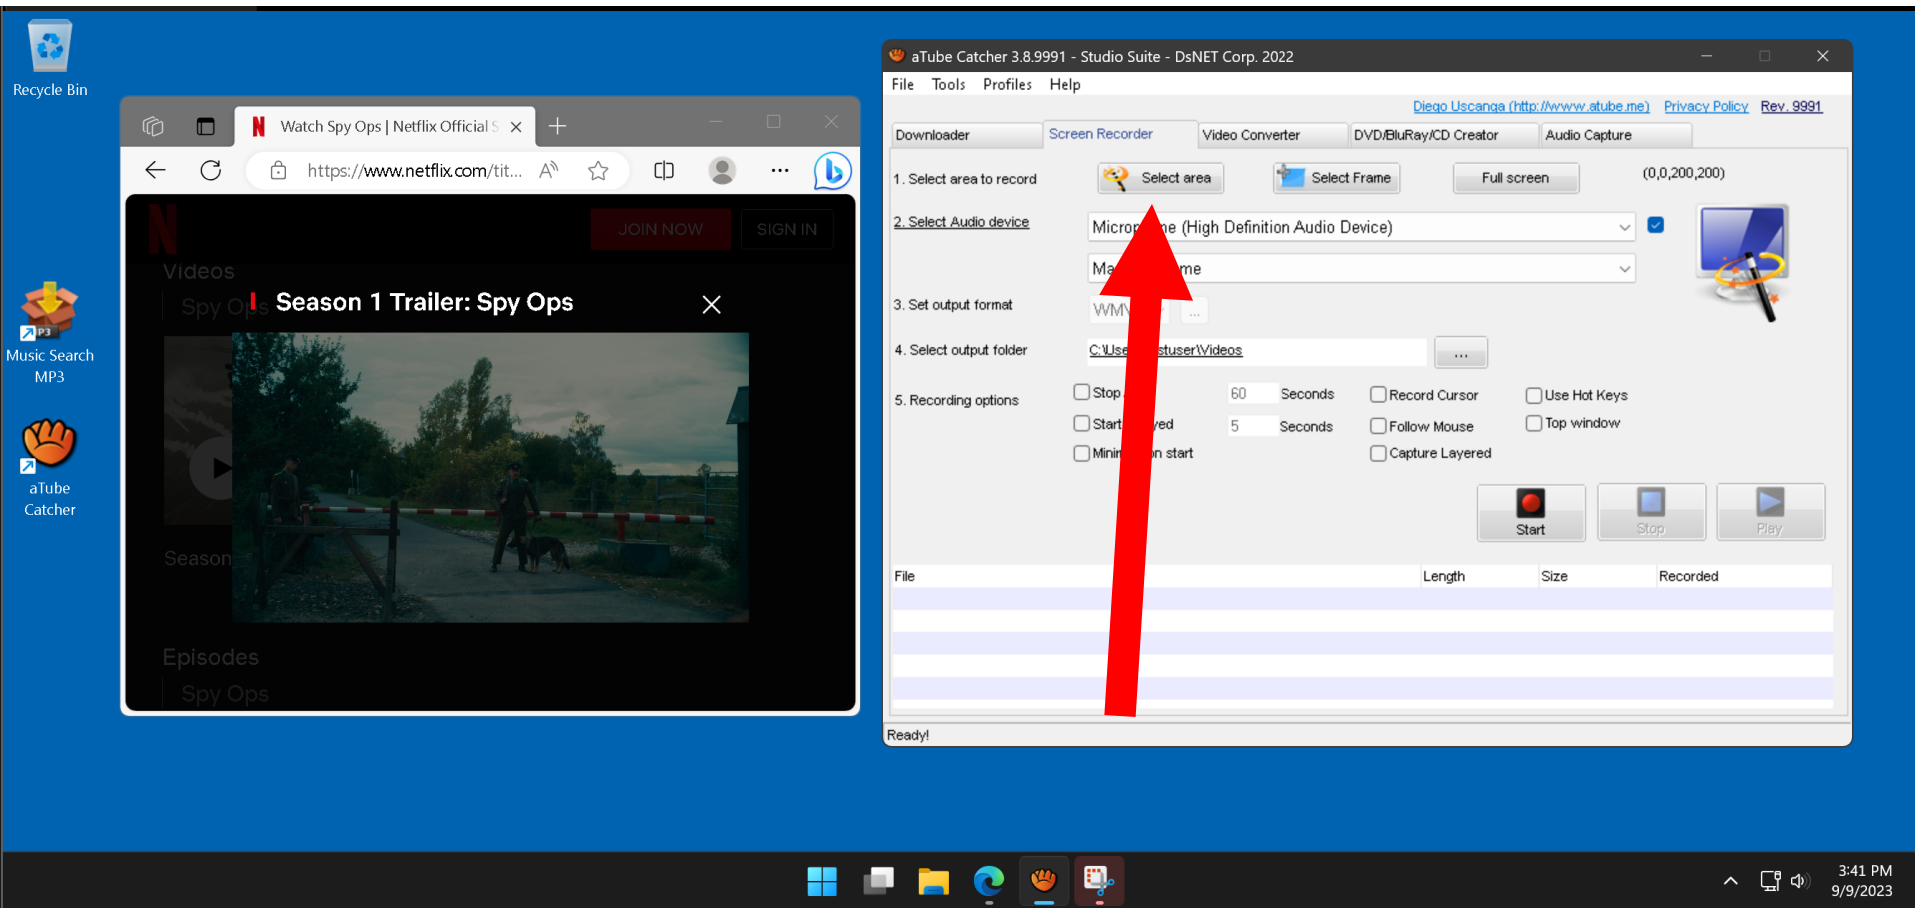

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

- Click on the "Select area" button of the "aTube Catcher" window.

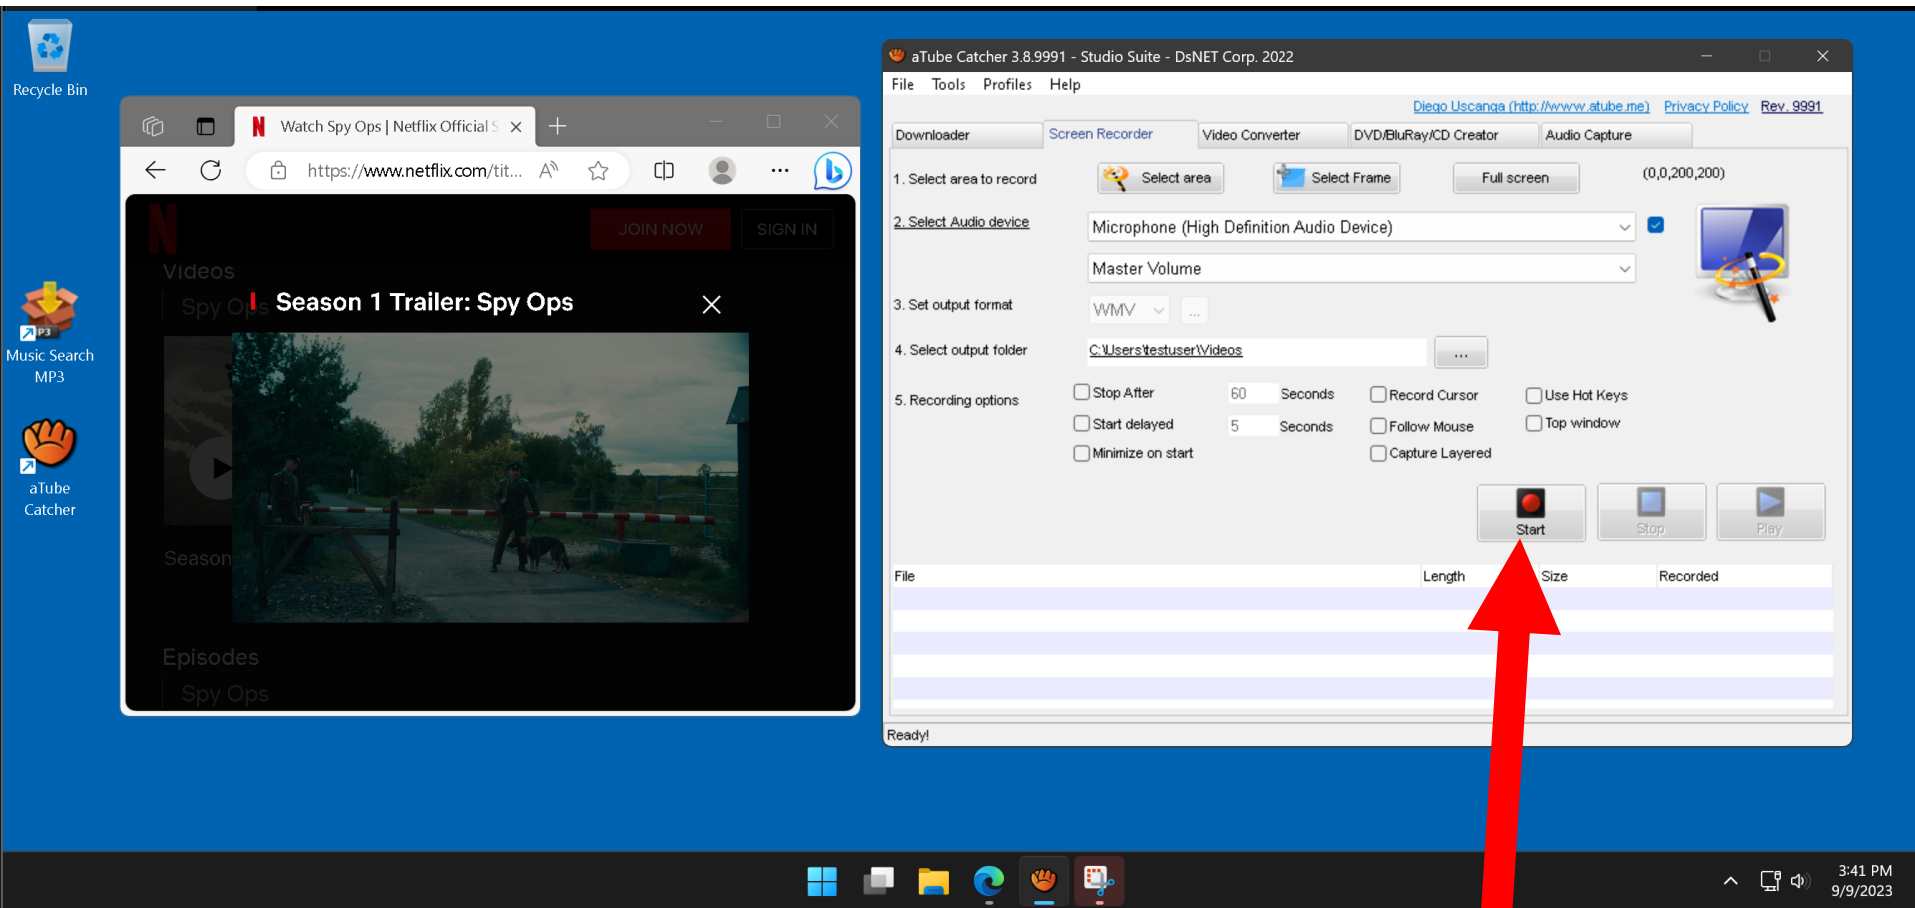

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

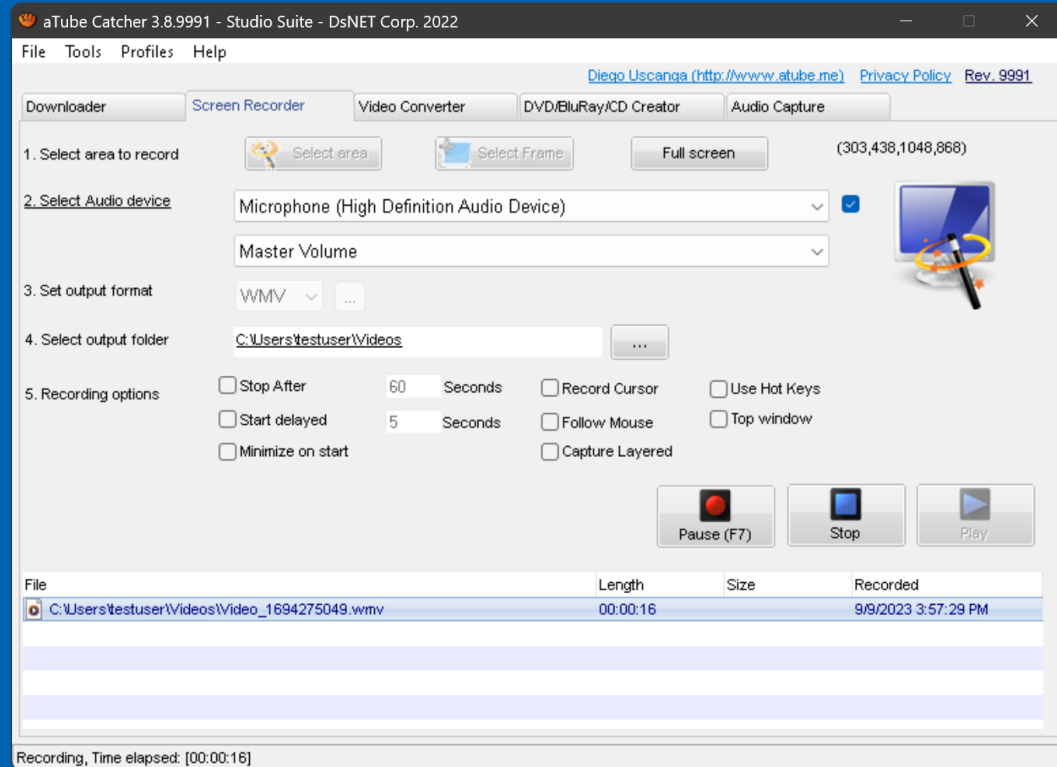

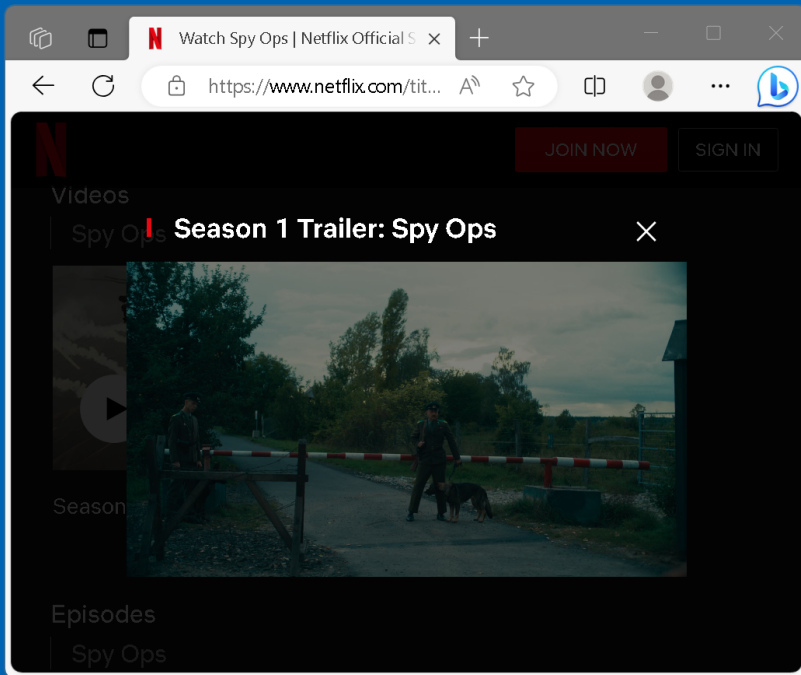

- The mouse pointer will turn into a + sign.

Use it to draw a rectangle to surround the actual playing area of video player in the Web browser:

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

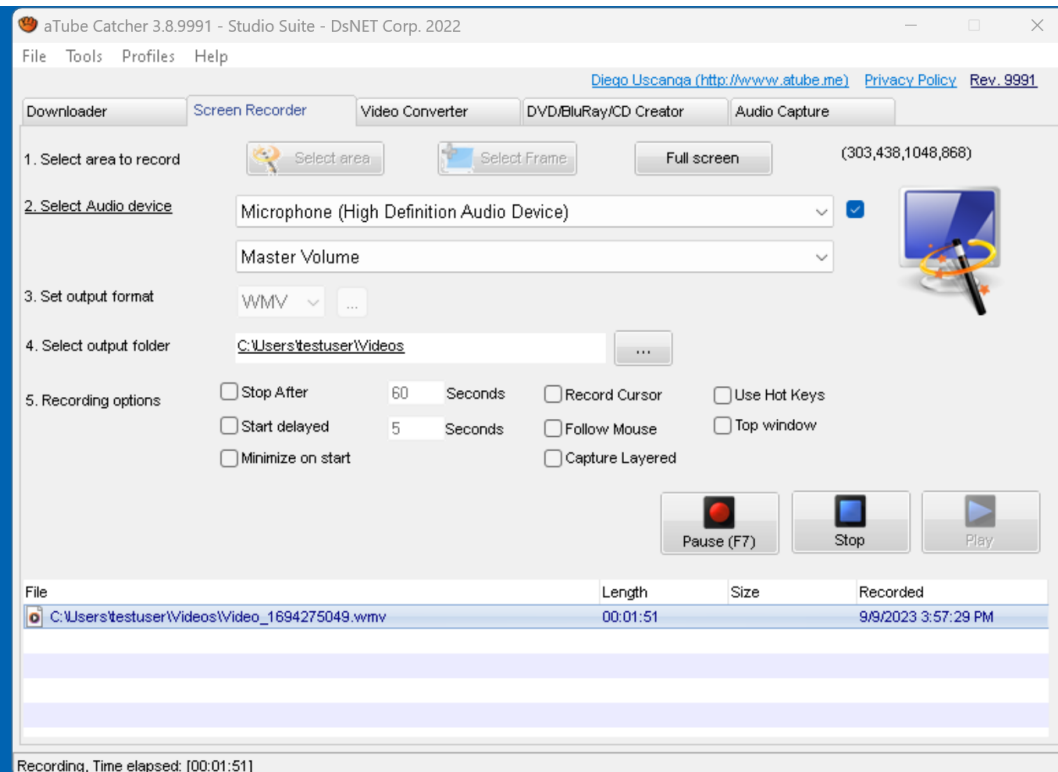

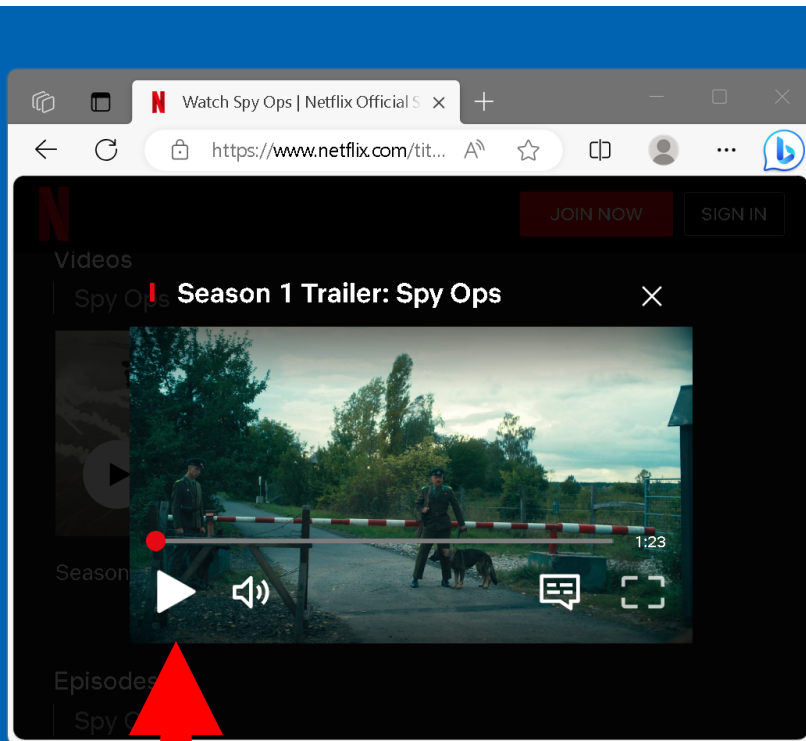

- Double-click on the "Start" button in the "aTube Catcher" window:

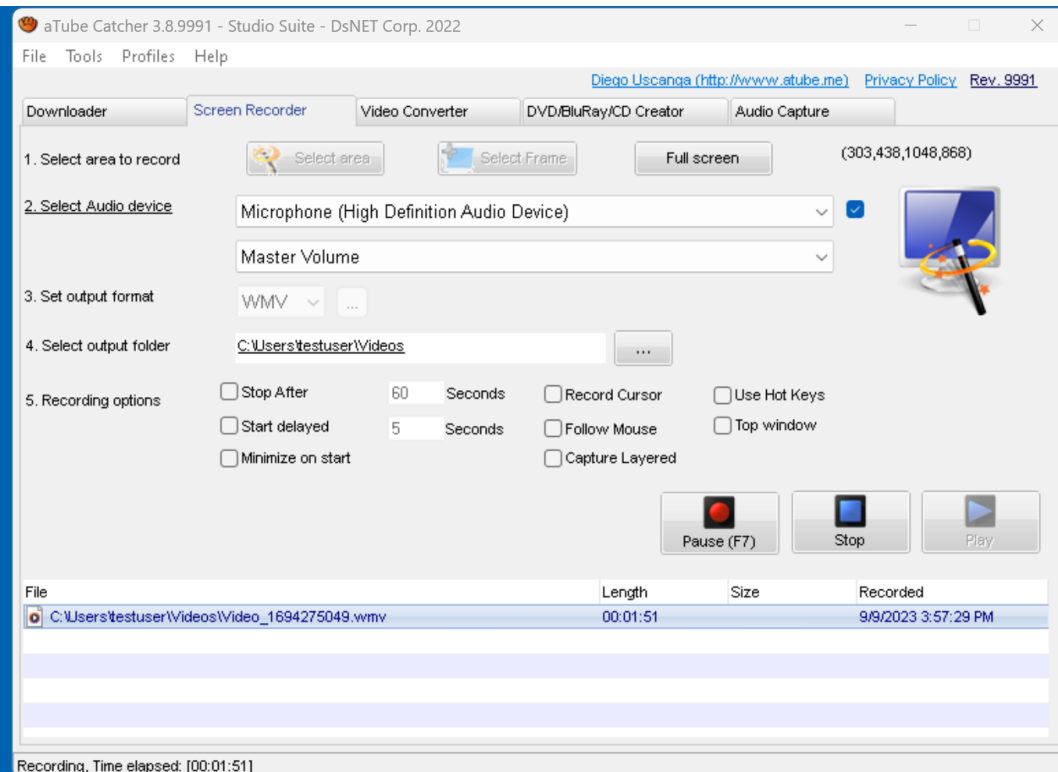

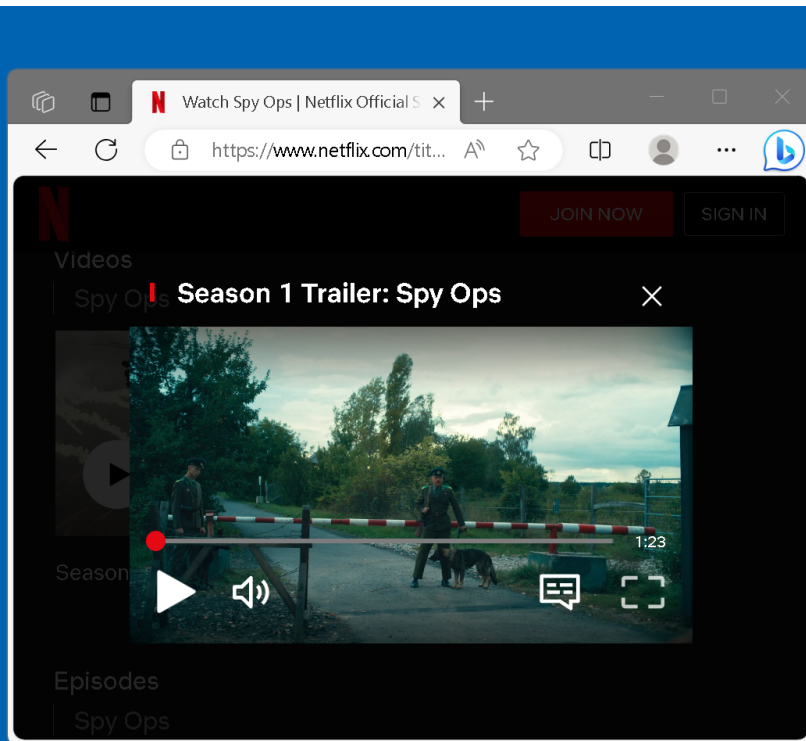

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

- Go to the Web browser and start the video player

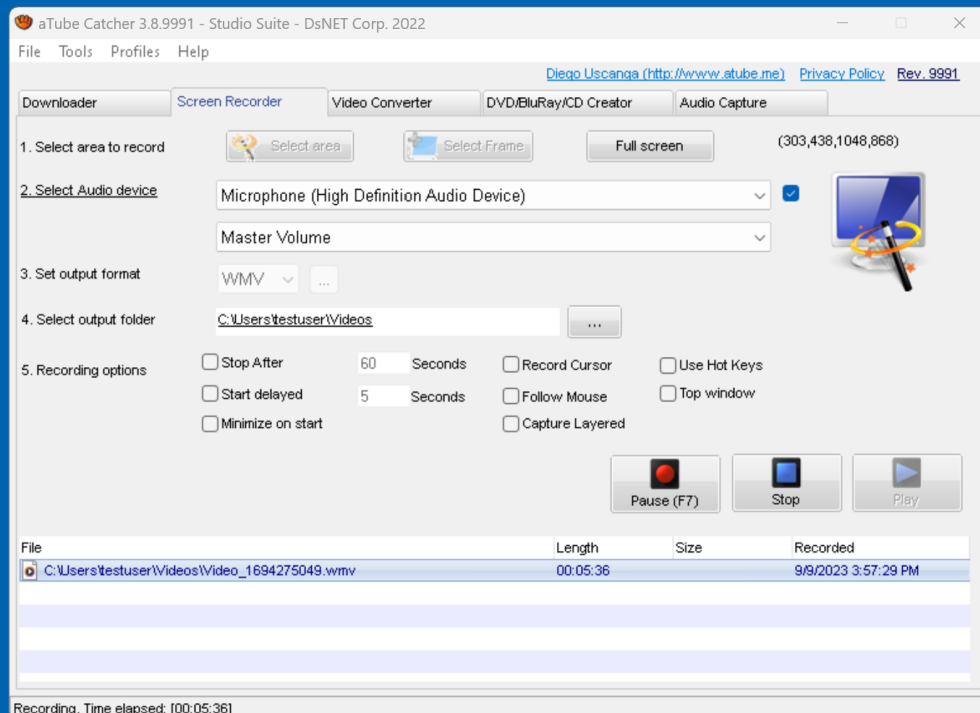

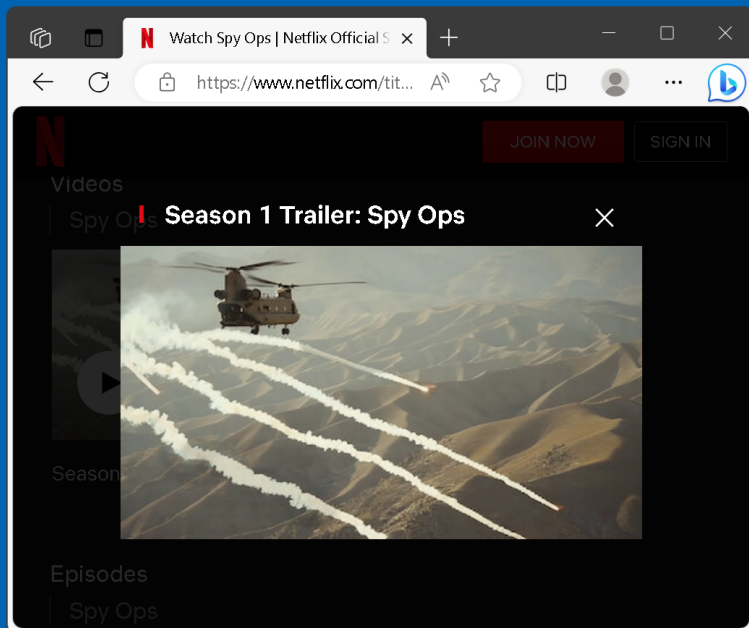

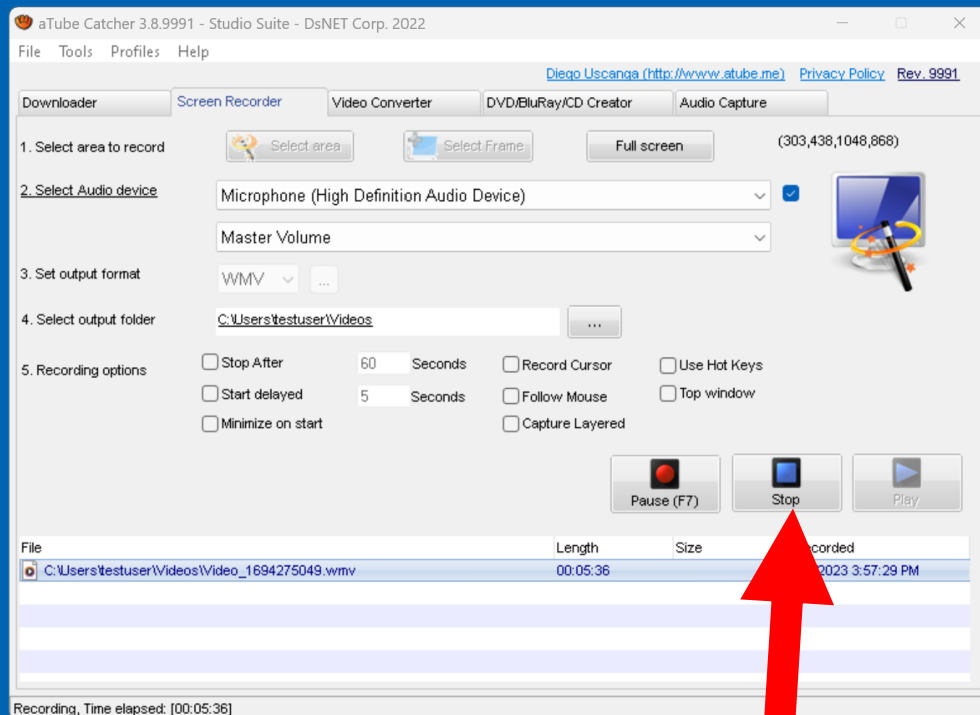

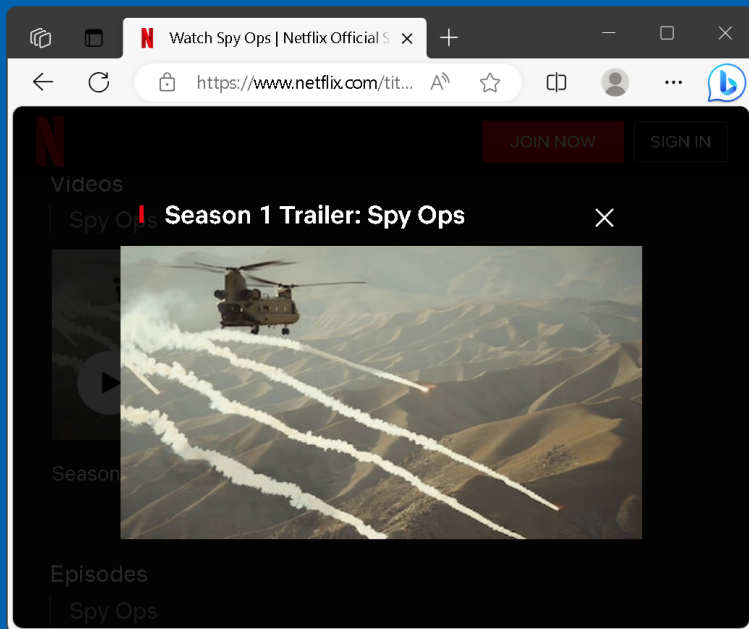

# USING "aTube Catcher" TO RECORD STREAMING VIDEO AT THE GRAPHICS INTERFACE (continued)

- When the video concludes,  
double-click on the "Stop" button  
of the "aTube Catcher" window

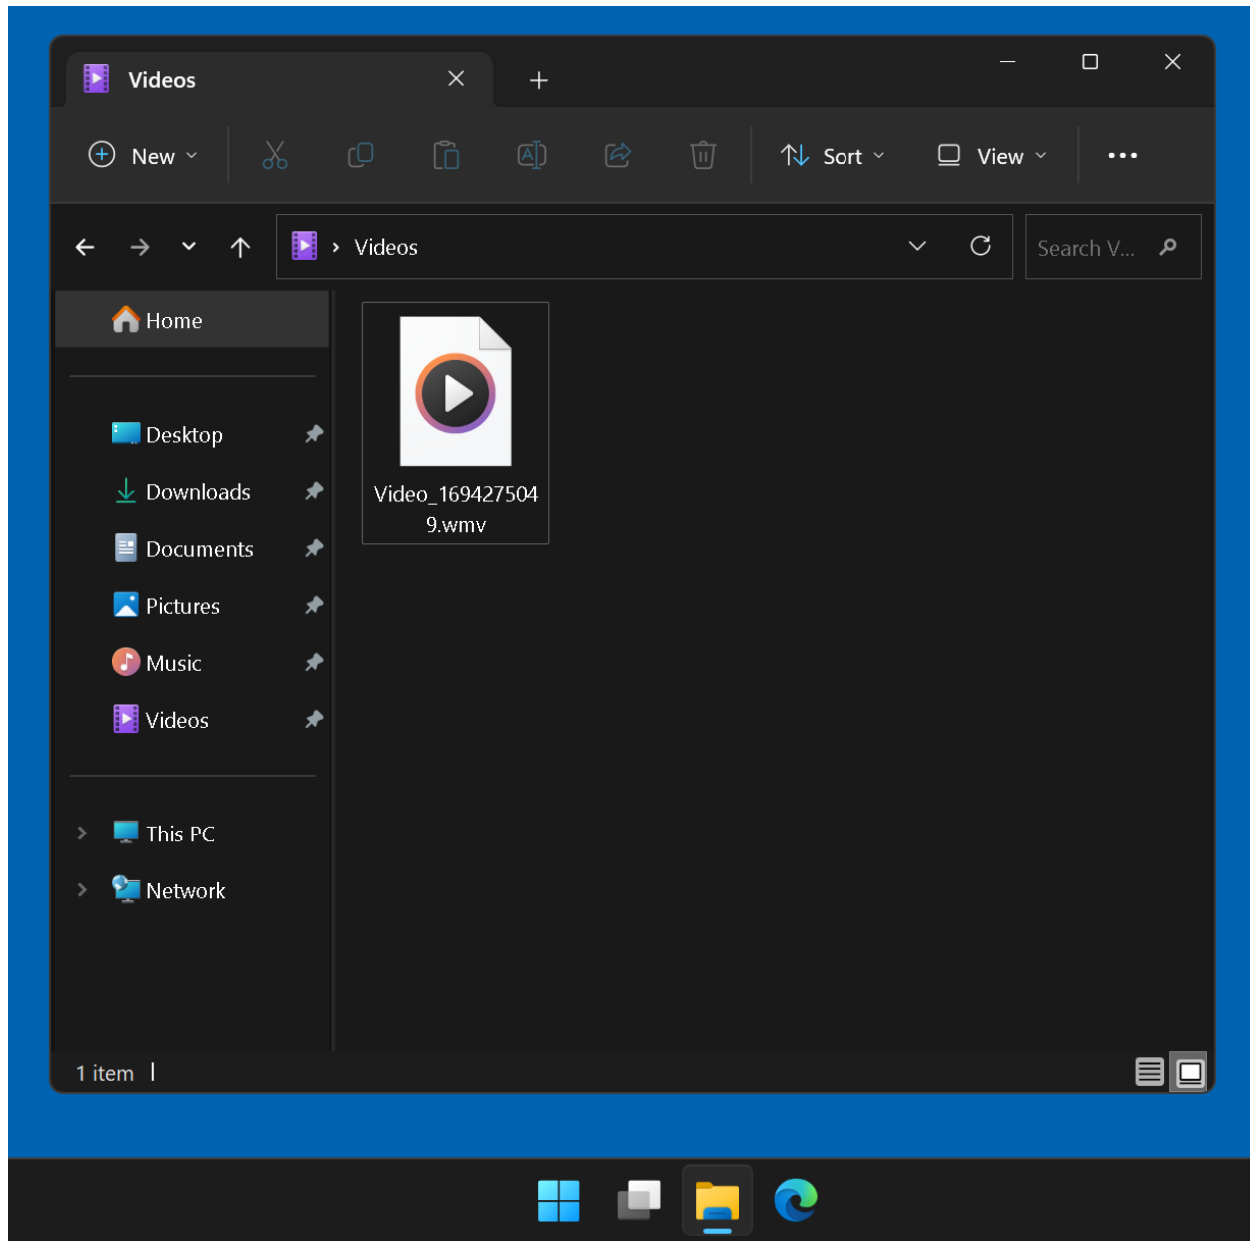

# USING "aTube Catcher" (continued)

- In our example, the "media captured" MP4 file has been stored in the default location at C:\Users\<Windows user name>\Videos\
