April 1, 2020

Our cell phones are so handy to use, but they are designed to be held in one's hand. That's not so convenient when you want to watch a video or read an email.

"Moft X" comes to the rescue!

It's a compact device that attaches to the back of your phone and lets you set it up vertically or horizontally. There is a band on the back of the device that can be easily adjusted to give you a comfortable viewing position without having to lean over your phone.

There's even a space near the hinge to keep up to 3 business cards.

The "Moft X" can be left on your phone, or detached as needed.

The "Moft X" comes in 3 color choices: grey, blue and green

It measures 2 1/2" by 4 1/8".

This is a handy product for your cell phone.

There are other products, as well, for tablets of various sizes.

All prices are reasonable.

MOFT X
