Tucson Computer Society

Here's what you've always wanted, a storage device that's small and has large capacity. WD's new product has speed, reliability and functionality.

Its blazing speed is powered by NVMe (non-volatile memory express) technology which allows transfer rates up to 1050MB/s.

Sizes available are 500 GB, 1 TB and 2TB at reasonable prices.

Backup is fast and safe with 256-bit AES encryption.

Each unit is quite small and is easily hand-held.

Comes with a USB-C to USB3.2 cable, as well as an adaptor for USB-C to USB-A.

Backup is easy with the included backup software.

Prices are \$120 for 500 GB, \$190 for 1 TB and \$360 for 2 TB.
