Tucson Computer Society

Viewsonic introduced two VP ColorPro monitors at Showstoppers. The VP3481 is a 34-inch monitor and the VP3881 is a 38-inch monitor. Each has a curved screen and each has high resolution with a 21:9 aspect ratio and integrated speakers. The curved monitors make for easy viewing from any angle.

Connectivity includes HDMI, USB-C, and DisplayPort.

Prices are \$700 (34-inch) and \$1,000 (38-inch), respectively.

for details.

The company also introduced two mobile monitors which are designed for portability. Each has connectivity for USB-C and mini-HDMI. Each has 1080p resolution and includes a kickstand for portrait or landscape orientation.

These two monitors are intended to be attached to a laptop, desktop or other device, to provide local display ability.

Prices are \$240 (touch screen) and \$180 (non-touch screen)
